KINGSFORD.

From Our Own Correspondent.

Mr. Cephas Simpson, of Long Island, New
York, is visiting his relatives here and in New-
burg after an absence of five years.

Mr. Burrows, public school inspector for
Lennox, visited our school last week. The
school we learn is making steady progress
under Miss Dunlop's supervision.

Mr. Scott, editor of the Napanee *Braver* and
superintendent of the telephone, was visit-
ing here last week looking after the interests
of the *Braver* and the Telephone.

We have had telephone communication in
our village for some years, but we are glad to
learn that Kingsford is likely soon to have
telephone communication with the outside
world.

A handsome woven wire fence is about to be
erected around the church lot by the congre-
gation of St. Patrick's Church. Mr. James
McKinnick, of Selby, has obtained the con-
tract. The interest of the church also to be
improved. The ceiling will be newly plastered
and the ceiling and walls kalsomined.

St. Jude's Church (Church of England) is to
be painted and varnished and the walls kalsom-
ined. The work will be done by Mr.
James McKinnick, of Selby.

We regret to hear of the serious illness of
Mr. John C. Hailey, of Read, ex-Warden of
Hastings.

Mr. Norman Whiteman formerly of Lon-
sdale is about opening a blacksmith business
in the shop adjoining the mill property on the
north side of the river.

Mr. John McCullough, who is about moving
to Belleville, has rented his farm on the 3rd
con. Tyendinaga to Mr. Oliver Krause.

The many warm friends of Miss Eva Robin
were glad to see in the columns of THE TRI-
BUNE last week that the Deseronto people fully
appreciated the musical treat afforded by this
talented and accomplished artist.

The community were startled by the
announcement of the sudden death of Mr.
James Williams, of the 5th con. Tyendinaga,
on Sunday morning last. It appears the old
gentleman had been walking about his place
that morning before breakfast and coming
into the house enquired if breakfast was ready
when he suddenly fell over and instantly
expired. He was one of the oldest and most
respected residents in Tyendinaga and was
well known through this section. He was a
hale and hearty old man and was in his 79th
year.

Mr. Thomas Mangan has been buying a
number of cattle in this neighborhood for
shipment to Montreal.

Mr. Francis Brennan is very low, all hope
of his recovery having long since been
abandoned.

MARYSVILLE.

From Our Own Correspondent.

Miss Heaney has returned to her home at
Bowmanville.

Mrs. Gauthier, of Tweed, is visiting her
daughter, Mrs. Chris. Scanlon.

Mrs. Sweeney, of Napanee, who has been
spending the summer at New York, paid a
visit to old friends here recently.

Mr. Jas. Farrell and wife have returned from
Trenton to reside here permanently.

Mrs. John Noble and children, of Merriam
Park, Minn., are visiting at the home of B. I.
Allison, Esq.

Mr. Hicks, a C. P. R. conductor, of Fort
Gratier, Mich., and formerly a Napanee boy,
is, with his wife, renewing acquaintances in
this section.

Mr. Frank Burr and wife, of Pawlings,
Conn., are visiting at the home of B. I.
Allison, Esq.

A Grand River Indian, Seth Newhouse,
alias "Approaching Fire," alias "Blue Blazes,"
is still here attempting to poison the minds of
our people. His antecedents are pretty well
known; he had better go home. Our most
respectable Mohawks are ashamed of him.

The lucky nut industry is in full blast.
Barley is coming in freely the farmers being
convinced that it will not pay to hold on.

The visit of the Rev. R. Ashton, of the
Mohawk Institute, Brantford, and Mr. Ven-
ning, Secretary of the New England Co. in
England, to the Mission School and their
romantic trip, the proficiency of the school
and the general progress of our people are
encouraging and incentives to greater efforts.

N. Y.

From Our Own Correspondent.

Mrs. J. G. Allison presented her husband
with a daughter Wednesday last week.
Mrs. B. McGinness did likewise towards her
husband on Thursday last week.

Mrs. Briggs, of Tamworth, formerly a Miss
Ryan of Marysville, left Tamworth on Tues-
day for Vancouver, B. C., where her husband
and preceded her and where they will reside
in future.

An old resident of Tyendinaga township
named James Williams, aged 79 years, died
suddenly on Sunday morning and was buried
here on Tuesday.

Michael, son of Nicholas Callaghan, died at
Cambelford on Wednesday, and was buried
here today, Friday. Mr. Callaghan has the
sympathy of all his old friends here in his
bereavement.

LONSDALE

From Our Own Correspondent.

Mr. Norman Whiteman, of our village, has
made arrangements to move to Kingsford in a
few days to commence his business as a general
blacksmith.

Mr. Patrick McGinness has also started a
shop at Melrose in the same business.

We hear of a sad accident which occurred
on Sunday last north of here by the running
away of Mr. M. Hart's team, upsetting the
carriage and seriously injuring Mrs. McDermott
and her child who could not be taken home
and were left at Mr. Hart's. The child died
on the following Wednesday; it is thought
Mrs. McDermott will recover.

On Sunday morning one of the old resi-
dents, Mr. James Williams, of the 5th con.
Tyendinaga, was very suddenly taken from
among us by the hand of death. He was in
Lonsdale on Saturday, on business in good
health and on Sunday morning got up as usual
and attended to his cows, &c., then returned
to the house, sat down to breakfast, straight-
ened back in his chair and expired without a
word or a struggle.

Mr. Hamilton, one of Deseronto's mer-
chants, has commenced sending large loads of
goods to Lonsdale where he expected to
open out his stock in Mrs. Doxice's store
and be ready for business in a few days.

TYENDINGAGA RESERVE

From Our Own Correspondent.

The Mohawk Council have been asked to
remove the Carter slaughter house, the offen-
sive odors which on Sunday have been
offered as an excuse for non attendance at
church.

Sandy Culbertson is running a seine on the
old ground opposite the church; he expects a
good season.

We are all delighted to welcome back Chief
Amos B. H. Heaney. He returns to his old position
in the Big Store of the Rathbun Company on
Monday.

A Grand River Indian, Seth Newhouse,
alias "Approaching Fire," alias "Blue Blazes,"
is still here attempting to poison the minds of
our people. His antecedents are pretty well
known; he had better go home. Our most
respectable Mohawks are ashamed of him.

The lucky nut industry is in full blast.
Barley is coming in freely the farmers being
convinced that it will not pay to hold on.

The visit of the Rev. R. Ashton, of the
Mohawk Institute, Brantford, and Mr. Ven-
ning, Secretary of the New England Co. in
England, to the Mission School and their
romantic trip, the proficiency of the school
and the general progress of our people are
encouraging and incentives to greater efforts.

CRIMINAL NEGLIGENCE.

What might have proved a very serious
accident occurred at an early hour last
Friday morning. The Citizens' Band having
fulfilled an engagement at the Belleville fair
on Thursday were returning home to Des-
eronto in one of Thomas Gault's rigs. They
were driving along in the darkness when
suddenly the whole party, with one solitary
exception, were hurled from their seats and
with their valuable instruments, found
themselves struggling in a confused mass in
a deep ditch. It appears that the county
officials had been repairing the culvert at
the foot of the hill near James Maracle's.
A deep excavation had been made and the
criminal in the extreme the workmen when
night came departed leaving the work
unfinished but without a lantern or anything
else to warn the traveller of his danger.
The night being dark the band had driven
into the big ditch thus excavated; the horses
were thrown down to one side and seriously
injured, while the rig also was much
damaged. Several of the members of the
band, and more especially Mr. C. Macdonald,
sustained severe bruises and other injuries,
instruments were smashed, and it was little
short of a miracle that some of the men were
not killed. The members of the band
aroused Mr. Maracle to see the real condition
of things and also came to town and got
several citizens to go out and see the danger-
ous state in which the road had been left.
Mr. C. Macdonald, who was severely shaken
up and whose valuable musical instrument
was broken, has instructed his solicitor to
Belleville to proceed against the county
officials for damages, and, no doubt, the
other members of the Citizens' Band, and
Mr. Gault will take similar action. The
council will be mulcted in a nice sum for
damages in connection with this affair. It
seems that Messrs. Lunderth, O'Connor and
H. B. Rathbun came within an ace of finding
themselves in the same predicament as the
Band but escaped by the sagacity of their
horses.

SOLMESVILLE.

From Our Own Correspondent.

Threshing has been occupying the attention
of the farmers in this vicinity for the past
few days, as Mr. Spencer, the renowned thresh-
er, has been through here with his steam thresh-
er. He kept up his previous record by threshing
one day last week for Mr. Wm. Jamieson one
thousand bushels of oats at the rate of two
cents a minute and paid him as much as he
would like to hear from them.

Mrs. David Mitchell, of Missoula, Montana,
and Mrs. Gilbert, of Belleville, were the
guests of Mrs. James Crook last Saturday and
Sunday.

Mrs. Barber and her mother, of Shamou-
ville, are visiting on this side of the Bay.

Wm. D. Half paid this vicinity a flying
visit on his way to Cobourg.

Mr. A. W. Crook returned on Wednesday,
and int., for Montana where he intends to
make his future home.

Mrs. Maggie Simpson, we are pleased to
state, is recovering from a severe attack of
typhoid fever.

Those who have tried it, claim that the
best and cheapest way to rid a garden or
field of the purslane pest is to seed the land
with clover and grass. These will soon
choke out the purslane and after a few years
the ground may be again broken up and be
as clean as when new.

METHODIST SABBATH SCHOOL.

Last Lord's day was devoted to the review
of the lessons of the past quarter in the
different Sabbath schools of the town. The
exercises in the Methodist Sabbath School
were on an elaborate scale and of a
very interesting character. The work had
been assigned to the lady teachers and a
formed their task admirably.

A splendid attendance, teachers and pupils to
the number of 340 being present upon the
occasion. Mrs. A. Campbell, of the Para-
son, presided in the capacity of temporary
superintendent of the school. The pro-
gramme opened with the hymn "Praise Him
Not, O Gentle Saviour" sung by the whole
school, after which Mrs. Campbell led in a
prayer of great spiritual fervor. A number
of scriptural quotations were then given and
the school again united in singing "Work
for Night is Coming." Mrs. Campbell
after some introductory remarks then pro-
ceeded to a review of the first two lessons of
the quarter. The other ladies who took
part in the review were Mrs. E. Richardson,
Miss Porter, Mrs. Baldwin, Mrs. S. Haight,
and Miss Scott. Mrs. B. W. Wash-
burn gave some object lessons to the infant
girls' classes and their parts admirably
classes by means of a blackboard containing
some elaborate drawings which conveyed
the most grasped and important lessons. All
the ladies performed their parts admirably
and it was evident that careful study and
analysis of the different lessons had char-
acterized the work of the school during the
previous quarter. The review exercises
were varied by musical pieces given by the
girls' classes and readings of appropriate
selections by Mrs. T. C. Fraser and Mrs. R.
E. Northmore. At the close of the Review
Miss Warrantman submitted the regular
quarterly report, which showed that during
the term 3,964 verses had been learned and
\$37.31 collected, an excellent showing when
it is remembered that the past quarter
embraced the vacation season when so many
teachers and pupils of the school are away
from home. During the past three quarters
the average report was as follows:—1st,
7,592; 2nd, 6,470; 3rd, 3,964; total, 17,996.
The collections during the same period were:
1st, \$40.84; 2nd, \$41.95; 3rd, \$37.31; total
\$119.10. To this amount must be added
presents of entertainment in the spring
\$28.00 and excursion \$38.95, making a grand
total of receipts thus far of \$187.05, figures
which speak more eloquently than words.
Although the exercises were continued
rather too long, the interest was sustained
throughout. The exercises from beginning
to end were conducted by the ladies and
pastor and regular superintendent being
relegated to a back seat for the time being.
Miss Campbell fulfilled the duties of organist
and a young lady was organ blower; ladies
acted as ushers and ladies took up the col-
lection. The pulpit platform was hand-
somely decorated with foliage plants and
choice flowers. We cannot close our report
without complimenting Mrs. Campbell and
her staff on the success of the review
exercises, and extending our congratulations
to Rev. A. Campbell, pastor of the church,
and Mr. A. A. Richardson, Superintendent
of the school, on being supported by such a
zealous corps of efficient teachers.

Pruning—If orchard trees have been
properly cared for from the first, there will
be but little pruning needed, and it matters
not much at what time it is done. Grape-
vines, currants and gooseberries may be
pruned soon after the leaves have fallen.
Blackberries and raspberries should be
pruned by cutting out the old canes as soon
as the fruit is gathered.

New and Desirable Goods at CHEAPSIDE THIS WEEK

HINCH & CO., Napanee.
Private Office for Marriage Licenses. Entrance through Max Fox's door. Leaders in General Dry Goods and Millinery.

Special Agent in Charge:

TO THE PUBLIC.

WE beg to return our most grateful thanks to our numerous Customers and very many friends for the liberal patronage accorded to us during the two years and a half we have had the pleasure of doing business among you. We take much pleasure in announcing that owing to the increase in our business during the past year we are compelled to have larger premises, therefore we have rented from Mr. McCullough the CORNER STORE lately occupied by Mr. Hamilton.

We expect to show as good a stock of Fall Goods as was ever offered in Deseronto, and as for prices and quality we will let the Public judge for themselves. If we have given satisfaction in the past we will guarantee it in the future. Hoping the same patronage will be accorded to us in our new store,

We are, yours respectfully,

KERR & WIMS.

Mrs. Dalton's millinery opening, Saturday October 5th.

THE TRIBUNE office is headquarters for school books, slates, &c.

Are you going to buy a new Parlor Suit, Side Board, Dining Table or Bed Room Suit this fall, if so you should call at J. Gibbard & Sons, Napanea. They show the latest styles and are selling at prices that cannot be equalled in this part of Ontario.

Remarkably cheap stationery at THE TRIBUNE office.

Five popular story books at THE TRIBUNE office.

Shannonville Fair, Tuesday, Oct. 5th.

Another lot of Oct. Young Lady's Journals received at THE TRIBUNE office. The number is regarded as one of unusual merit.

Pleasant books where with to pass an evening for sale at THE TRIBUNE office.

LOCAL ITEMS.

Next Tuesday, Shannonville Fair.

Chicken-pox and mumps are prevalent.

Sunday next is the sixteenth after Trinity.

There will be a great rush to the Shannonville fair on Tuesday, Oct. 5th.

The Bishop of Ontario received a cordial welcome on his arrival in Kingston.

The shingle department of the Cedar Mill is running full blast in order to fill orders.

Three hundred and fifty four years ago today, the first edition of the English bible was printed.

There are more Canadians in Dakota than there are in all the Northwest Territories of the Dominion.

Mr. Frank Wood is rushing things night and day at the charcoal department of the charcoal works.

Fifty additional cottages would find ready tenants in Deseronto. People are looking about every day for houses.

Mr. J. Macleod, of the door factory, has increased his staff of men in order to fill the increased orders coming in this fall.

Mr. J. C. Chamberlain and family have moved to Trenton where they make their future home. Mr. Chamberlain was an estimable citizen and a host of friends in Deseronto will unite in wishing him and his family all success in their new home.

More weddings are talked of as likely to occur in the near future.

Sophiasburg voters' last revision court at Deseronto on October 18th.

Chief Gonyon attended the funeral of the late Chief Allen, of Napanea, on Tuesday.

There was a light flurry of snow between two and three o'clock last Sunday morning.

G. T. Wakeford, formerly of Deseronto, is again despatcher for the C. P. R. at Smith's Falls.

The drainage of market square appears to be imperfect, large pools of water forming in some parts.

Mr. G. E. Clement has Mrs. Edward Gracey's new house on Thomas street nearly ready for occupation.

A gentleman lost a sum of money in town one day last week. The finder will come for a great favour by leaving it at THE TRIBUNE office.

Mr. Jeffrey, having got pointers in advance from the renowned Viggos, has added an extension to the coal shed. Look out for a hard winter.

Our thanks are due to all who so quickly responded to our call last week. We hope there will not be a subsequent subscriber on our books by the 15th inst.

The steamer Ella Ross has been taken off her route for the season and has been replaced by the Deseronto which now make the regular trips to Picton and Napanee.

Mr. A. W. Cronk, of Solmesville, left for Livingston, Montana, this week. He is an ardent sportsman and jolly good fellow who will make himself a favorite wherever he goes.

Mr. M. Marrigan has purchased from Reuben Lindsay a cottage on Brant street which he is renovating at considerable expense, so as to make it a desirable residence for a tenant.

The trial of the Lloyd brothers, of Tyndinaga, charged with criminal assault on a young girl has been again postponed until next spring. In the meantime they languish in the county jail.

A single sheet of paper six feet wide and seven and three quarter miles in length has been made at the Watkinson paper works. It weighed 2,207 pounds and was made and rolled entire without a single break.

There are many changes of advertisements in this week's TRIBUNE. Read them all and learn what the business men are doing to gain public patronage. The men who thus invite your trade should not be forgotten.

If some of our town grocers would sweep the boardwalks in front of their shops immediately after closing up on Saturday night, their premises would not present the untidy appearance which they now have on Sundays.

Commissioner Marrigan has been busy spreading stone and gravel on Market Square. The boardwalk facing on the square should be twice as wide as it is, and accommodate half of the traffic on market days.

All visitors to Belleville should call at the great mercantile establishment of Geo. Ritchie & Co., who show the latest and best assortment of dress goods, gent's furnishings, ready made suits, &c., to be found in that city.

Capt. Dolman, who has been of late in charge of the Gannaque corps of the Salvation Army, succeeds Capt. Gale in Deseronto. She arrives to-day and comes highly commended as a diligent and competent officer.

Contractor Shetler has Mrs. Barton's new house well forward and the platters have been busy during the past week. Mr. Shetler is now busy making some additions and changes on Mr. Wm. Lenderoth's residence on Centre street.

A woman called at a Long Island drug store and asked for paracetamol, and the drug put her into laudanum and caused the death of her child. His excuse was that he was troubled in his mind, and his having given to a party with another fellow.

The advantage in sorting out the fruit before sending to market, not only includes a quicker sale, but realizes a better profit; and when there is anything like a fair crop this will be found the most profitable plan with all kinds of fruit whether marketed at home or sent a considerable distance away.

The members of Deseronto Branch, No. 86, C. M. B. A., will hold the formal opening of their new hall, which is situated in the upper flat of the new Oliver Block, Main street, on Wednesday evening, 16th inst. Other branches in the district who are invited to a pleasant gathering may be expected on the auspicious occasion.

"Enquirer" is a grievance of old standing. We are ignorant of the regulations of the paper, but some stringent regulations for the protection of the public, and these regulations should be enforced. The bakers and the public alike demand that the council take action in such an important matter.

The Rathbun Company have recently secured about eighty-five square miles of valuable timber limits on the head waters of the River Trent. The acquisition of such an extensive and valuable property must greatly inure to the extension and benefit of their great business in Deseronto. The Company have also made purchases of large quantities of wood and other stuff along the extension of the N. T. & Q. R. way.

Although the directors of the Napanea Fair have not favoured us with a press badge we may acknowledge that the Napanea fair will be held on the 8th & 9th, the latter day being the great day of the fair. The Varma carries an excursion from Trenton, Belleville and all bay ports passing Deseronto at 10 a.m. Tickets 50 cents, from Deseronto 25 cents, for the round trip. The Lennox fair is second to no other exhibition in Canada.

All the friends of that popular officer Capt. C. H. Nicholson, of the steamer Hero, will regret to learn that he gave up command of that vessel on Wednesday for the purpose of starting immediately to Colorado with his young wife who is a victim of consumption. The doctors recommend the change which will help her to recover. It is probable that the Captain will remain in the west.

A farmer named Douglas who was insane or eccentric took lodgings in Hamilton. The landlady became frightened because the man kept in his own room and the cat in the police. They made an arrest in the dark hours of the night when the poor man thinking they were again entering to capture him for an insane asylum, fired a shot from his revolver to frighten them off. One of the police entered the room and shot at random but it struck the lodger who died a few hours afterwards. The police attorney bringing this brought into ugly notoriety by this official murder.

A constable armed with a search warrant could not find a third party man in Deseronto. That species of staterman disappeared from our midst. Twaever thus.

Miss Wartman's millinery rooms were thronged with fair visitors last Saturday, the occasion of her fall opening. All were delighted with her attractive display of hats, bonnets, trimmings, &c., which certainly looked very inviting. Large hats, bouffant hats and box hats are the prevailing styles this season. Velvet still takes the lead, although felt is largely worn. All colours prevail but green is favorite, the shag being emerald, myrtle, serpent and bronze. Terra cotta is another favorite and is in all shades, the darkest mahogany, being very pretty. The trimmings are ribbons, birds, feathers. The season has opened auspiciously and Miss Wartman expresses herself much pleased with the business prospects of the season.

Railway Extensions.

The bridge at Yarker was finished last Saturday and pronounced a graceful and substantial structure. The Yarker-Harrow street branch will be soon ballasted. The Tweed is being raised with great energy the rails being laid at the rate of a mile per day. Work on the station buildings has been commenced and the cars are being erected with wonderful rapidity. The new line will be first class in every respect.

Let us Cult a Habit.

Nurserymen of all kinds have been exercising more industry and persistency this past year to get their advertisements in the newspapers, payment being almost invariably promised in kind—a donation of a few flowers, notes addressed to the poor editor. It is not time for nurserymen to exercise some self respect and pay in cash for their advertisements like other people. Newspaper men should combine and refuse to insert such ads unless on proper conditions.

A Remarkable Yield.

The Almonte Gazette says: We have had left with us a bean stalk almost as remarkable as the one we were wont to read about and wonder over when in our tender years. It was grown by Mr. Wm. Borrowman, of Belleville, and of the variety known as the "tree" bean, a small white bean, and said to be of excellent quality. The stalk contained 207 pods, which will average about six beans to a pod, and will yield nearly 1,200 beans from one seed. Prolific only mildly expresses it.

Family Tars.

The Mayor was aroused from his bed on Saturday night and repeated to use his influence to quell a little family disturbance which had broken out on East Dundas street. Complications had arisen which resulted in a declaration of war and a furious outbreak of hostilities. The lord mayor's residence was quickly brought to time by means of a broomstick wielded with fierce energy by his amiable consort. This weapon was broken and the lord mayor was subsequently pounded by his spouse and son until he presented a pitiable appearance. The chief was sent for but on his arrival found all in their beds. He gave them a friendly and gratuitous lecture on the pleasures of domestic felicity. It has been observed that the married life is a long one, and this week in a manner more subdued than formerly, which is proof that the lesson of Saturday has produced a salutary effect.

Business Changes.

Mr. M. C. Hamilton has moved to Lansdale and has taken possession of the premises. Mr. Hamilton while in Deseronto showed himself possessed of good business capacity and proved himself a gentleman of integrity in his dealings with the public. His removal to the people of Lansdale and vicinity assuming them that they will receive nothing but square dealings at his hand. The Tribune wishes him all success. The popular firm, Messrs Kerr & Wims will take possession of the shop vacated by Mr. Hamilton, in the McCullough Block. With a better stand and more room they may be expected to make things better and better enabled to please their patrons. They in turn are succeeded by Mr. Robert Adams, whole lot of goods. Mr. Cole yesterday moved into his handsome new tenorial parlor in the new Oliver Block, west of THE TRIBUNE office. A Bell, photographer, is doing fine business in the upper flat of the Geddis Block.

Shannonville Fair.

Next Tuesday, Oct. 5th, is the date of the Shannonville fair, held under the direction of the Tyndinaga Agricultural Society. Everything points to an exceedingly interesting exhibition as the entries are numerous, the premium list liberal and the directors working energetically. With fine weather there will be the largest attendance ever seen at Shannonville. Business men in Deseronto will find it to their interest to be there encouraged by the success of the agricultural interests of the Riding with which, year by year, Deseronto is becoming more and more identified. For the show of the farmers of Tyndinaga and Thurlow are endeavouring, not without success, to improve their stock and their methods of raising it. As a means of bringing old friends and neighbors together a fair affords ample opportunities. THE TRIBUNE hopes to see Deseronto well represented and encouraged by all the farmers of the district. Parties desiring information should write to or call upon Mr. A. Macfarlane, Secretary, Melrose, P. O.

Trucent Testimonials.

"Building lots can be purchased in Trenton, Carleton Place, and other towns for prices varying from \$100 to \$200 cost \$200 to \$300 in Deseronto. Such was the harmless paragraph which appeared in THE TRIBUNE a few weeks ago. We rather regret that the paragraph was so harmless in which lots could be purchased so cheap and that too on the installment plan. Trenton people have taken mortal offence at the paragraph. One of the newspapers in that town of illimitable possibilities denied the fact that lots could be purchased in Trenton at such figures, but as we gathered our information from an advertisement in its columns we cannot be blamed. Now comes some one who styles himself "A Frequent Visitor" (to Deseronto we presume) who writes to the Courier, not to deny our assertion,—he could not do that,—but to extol why building lots are so much higher in Deseronto. He says he happens to be acquainted with the facts of the case as he has been in Deseronto for some time. Here is one of his facts, from which our readers may learn the character of the others. He states that the corporation of Deseronto covers an area of three-fourths of a mile long by one-fourth mile wide. Now it happens, as all residents of Deseronto know, that the city of Deseronto is a narrow strip of land, only one-fourth of a mile in breadth. "A Frequent Visitor" says that he has been in Deseronto for some time and that he has seen the facts of the case as he has been in Deseronto for some time. Here is one of his facts, from which our readers may learn the character of the others. He states that the corporation of Deseronto covers an area of three-fourths of a mile long by one-fourth mile wide. Now it happens, as all residents of Deseronto know, that the city of Deseronto is a narrow strip of land, only one-fourth of a mile in breadth. "A Frequent Visitor" says that he has been in Deseronto for some time and that he has seen the facts of the case as he has been in Deseronto for some time. Here is one of his facts, from which our readers may learn the character of the others. He states that the corporation of Deseronto covers an area of three-fourths of a mile long by one-fourth mile wide. Now it happens, as all residents of Deseronto know, that the city of Deseronto is a narrow strip of land, only one-fourth of a mile in breadth. 1889 -:- AUTUMN -:- 1889

NO LITTLE SURPRISE STORE team coming from the depot with a load after load of large iron-bound cases, and bales of goods, which had just arrived from Europe. We are glad to inform those who have been patiently and anxiously waiting to see these goods, coming as they do direct from the Mills and Looms of England, Ireland and Scotland, France and Germany, that they are now opened, marked, and placed on our shelves and tables.

WE NEED HARDLY POINT OUT to an intelligent Public the advantages to ourselves and patrons as it must be apparent to everyone that by so doing the commissions of wholesale houses and of all middlemen are saved. We have carefully compared the cost of many lines of our imported goods with the prices charged by wholesale dealers, with the result that we find that at least 10 per cent. is saved by importing, and the goods are sure to be of the most recent manufacture, and consequently of the latest styles and designs. Moreover, in many instances, goods purchased from middlemen have lain in their warehouses for a long time which detracts from their value and wearing qualities, and as styles change every year goods carried in this way are behind the times, though often represented by those interested in selling them as being of the latest dates.

THE ONLY WAY to ensure getting New, Fresh Goods is by purchasing from the Manufacturers. Our experience in past years has been entirely satisfactory and has encouraged us this year to import not only larger quantities but to add many new lines, and we now place at the disposal of the Public a large and varied assortment of Dry Goods, &c., which for judicious selection, extent, variety, and general excellence, will compare favorably with the stock carried by any of the houses in Toronto and other large cities, and is certainly unequalled by any similar establishments in central Canada.

THE LIMIT of our space of course precludes an enumeration of the goods, Dress Goods of every popular make, Mantles and Mantle Cloths, Silks, Velvets, Plushes, Laces, Hosiery, House Furnishings, Cloths, Tweeds and Meltons. A Specialty is made of Tailoring to order.

WITH REGARD TO PRICES, The 10 per cent. which we save by importing we give direct to our Patrons, or in other words we save them 10 cents on every dollar's worth of goods they buy from us. Do not be deceived by small dealers who tell you and advertise that they import direct as the records at the Customs Office prove that we are the only direct importers of Dry Goods in this vicinity.

EVERY DEPARTMENT will be found replete with new and seasonable Goods.

WE HOPE to have the pleasure of showing you our Stock at an early date, confidently believing that the merits of the goods and the Low Prices charged for them will meet with your approval and induce you to buy.

THE BIG STORE.

Main Street, Deseronto.

September 26th, 1889

Farm for Sale or to Rent.

THE Undersigned offers to rent or sell his Farm, lot 35, on the 3rd concession of Tyndenna. Fourth Class - Maggie Dunn, Stella Vandervoort, John Hill.

LIGHT WEIGHT.

To the Editor of THE TRIBUNE,
Dear Sir: - I wish to get some information relative to bread, and to the law governing the sale of it, and the number of pounds that there should be in a loaf in our town. I am quite familiar with the law respecting the above points regarding cities, but I have come to the conclusion that we cannot have any law at all here, respecting the quantity (that is the number of pounds) which should constitute a loaf.
For a long time here in Deseronto light bread has been the rule, but for some months the evil has increased or in other words the weight of the bread in a loaf has decreased so that three and one half pounds is about all you can secure when purchasing what purports to be a four pound loaf, and the half loaves are worse still.
Our City Fathers are aware of these facts, the facts also, but no one likes to put their foot forward and kick up a row about this bread business. It is an outrage and should be remedied. If the price of bread is too low, I would say put up the price but give us what you claim to us. If it is four pounds for a loaf put in four pounds of dough not three and a half.
Coming back to the first point again have we any law here regulating the sale of bread? If so, have we the proper machinery to enforce it?
Yours sincerely,
ENQUIRER

FAREWELL TO CAPT. JOHN GALE.

Capt. John Gale, who has been in charge of the Deseronto Salvation Army during the past year, bade farewell this week, and left yesterday for his new post at Gananoque. Special services were held this week, all of which were deeply interesting.
On Sunday Capt. Gale, assisted by Capt. Paine, held three meetings all of which were large, enthusiastic and attended with rich blessings. Another joyous meeting was held on Monday evening. On Tuesday evening a select meeting and banquet was held when the Captain gave his formal farewell address to the attendance of soldiers and friends. The Captain gave an excellent address referring to his work in Deseronto and the good work generally, of an encouraging character. He would have stayed, but duty called him elsewhere. After Army, Rev. A. Campbell, pastor of the Methodist Church, gave a very happy address in which he referred to the good work done by the Army in Deseronto in support of his statements. He wished them all success and hoped that God's blessing would ever attend the whole party. He expressed his sorrow at parting with such a good officer as Captain Gale. The regular meeting being over, the whole party were invited to sit down to a table which was piled with all the delicacies which are calculated to please the taste. The Army had made credit for themselves and certainly deserve credit for their kindly hospitality. Grace was sung and the feast enjoyed by all the Company.
After supper Capt. Gale accompanied by the assumed command and after a few pleasant remarks ordered up a collection when a liberal sum was raised for the Army in Deseronto. The new leaders to the Army in the past, the Captain replying his gratitude to the members who had called upon him and to the kindness and liberality of Mr. Godfrey Culp who was present and who has proved such a good soldier to the Army in the past, and to the kind treatment ever accorded by the people of Deseronto. The Tribunes representative being called upon also bore testimony to the good done by the Army in Deseronto and elsewhere. The meeting was a great success. Another happy meeting was held on Wednesday evening. Captain Gale has proved a capable and efficient officer who has done good work in Deseronto. The new leaders to the Army in the past, the Captain replying his gratitude to the members who had called upon him and to the kindness and liberality of Mr. Godfrey Culp who was present and who has proved such a good soldier to the Army in the past, and to the kind treatment ever accorded by the people of Deseronto. The Tribunes representative being called upon also bore testimony to the good done by the Army in Deseronto and elsewhere. The meeting was a great success. Another happy meeting was held on Wednesday evening. Captain Gale has proved a capable and efficient officer who has done good work in Deseronto. The new leaders to the Army in the past, the Captain replying his gratitude to the members who had called upon him and to the kindness and liberality of Mr. Godfrey Culp who was present and who has proved such a good soldier to the Army in the past, and to the kind treatment ever accorded by the people of Deseronto. The Tribunes representative being called upon also bore testimony to the good done by the Army in Deseronto and elsewhere. The meeting was a great success. PLEASE SHOW YOUR HAND

TRoubles in the way of applying rules in palmistry.

Hard to Get the Subject to Say "Am I Like That?"—What is Indicated by the "Line of Saturn"—Short Little Fingers, and Thumbs of Different Kinds.

I have been twenty years at the study of palmistry or chiromancy, and during that time have not been able to discover any philosophical reason for believing that the lines of the hand and the shape indicate character. The want of a connecting theory frequently causes me to lose all hope and belief in the investigation; but practice restores confidence. No one can look at even a few hands every month for years together without being driven to the conclusion that they really do contain a guide to much that is to be found in the nature of their owners.

THE LINE OF SATURN.

If the lines are long, clear, red, gently curved, except the upright ones, few in number, and shown in a hand that has fingers with substantial, not too long, long roots, the best sort of nature may be looked for. In the case of persons of brilliant original talent and thought, the upright line from the base of the palm towards the fingers is never absent and is sometimes repeated twice or even thrice. It is called the "line of Saturn," and springs from many different places. In musicians, actors and some others it usually starts from below the little square. When it is joined at the base, the curved line round the thumb an independence of feeling out of proportion to the will strength or the pride of the rest of the character is to be expected. If the line curled down to the head, it crosses the hand from above the thumb, usually turning down to the pad below the little finger, be entirely separate from the line that surrounds the thumb, the whole character will be modified, whether it be good or bad, one by this. As a rule that modification will tend to make the person seem more clever when thinking out of his own head, but less able, however sympathetic and docile, to adopt the modes of getting on with his teachers achieve their success.

A short little finger often goes with a sweetness, a readiness to repent of evil and of anger, and sometimes even a cheerful abnegation. Both kinds are consistent with a strong will, and negative wishes, or, as it is usually called, obstinacy, as this is a quality capable of drawing strength from many sources. A large ended thumb is very good in a good man, and helps him to fight the battle of life. In a bad man, it enables him to be extra oppressive at home, and to make his opinions of more effect than their value warrants. A thumb whose end is large and its shaft poor, as though it were a door handle and weak neck, and weak end of the hand, is not an advantage. This leads to many evils, and, though often found in a good man, gives a tendency to change the reasons for his good deeds or good opinions, even after he has been so conscientious in closing on his duty. Such change will usually be rather of the nature of a reversal than a drifting away.

BLUNT FINGERS AND THUMBS.

Blunt ended thumbs and fingers, with a natural tendency to politeness of address or a polished approach, except when, as in persons much before the world, this has been learned as a part. But in good types it goes with a gentleness and kindness of manner bred by a knowledge of what has taught the owner to counteract his faults before they have time to hurt innocent people. It follows as a matter of course that among women fingers whose fingernails and thumbs are pointed are generally the more superficially charming. Those with large, blunt ended fingers are (if intellectual and educated) more valued and more impressive, and even commanding. But command, like modesty, has more than one origin, viewed as an expression of constitutional tendency.

Pointed fingers people have no excuse if they are not agreeable, for it costs them little to seem so. If large ended blunt fingered people show much more than politeness, self abnegation in mental matters, indulgence to shallow weakness, patience with anger and folly, they are either entirely uninterested personally in the occasions that bring them into the office before them, or have bought their good nature at a price, like the Centurion his freedom.

When a student of the hand has read and applied for himself all the volumes that have been written on the subject, and when he has also discovered how to discount the bias of his different authors by guessing at their hands and accounting for their predictions, and when he has achieved such proficiency in looking at a hand and adding up all the conflicting forces suggested by its balance of lines and segments that he can at once tell how to classify the owner and what to expect of him, yet the greatest of all difficulties will remain to be surmounted. This hard hill to climb is nothing less than to describe a character in such terms that the owner of the same must confess his portrait and say, "Yes, it is true; I am like that,"—Edwin Ellis in Universal Review.

The "Addressee."
The postoffice department has recently coined a word which will probably find its way into the dictionaries. It is "addressee" and signifies the person to whom a letter is addressed. We presume it will be equally applicable to the charming young lady who is receiving the address of a lover. It would work wonderfully in this way in such a case: "Jones is paying his addresses to Miss Smith."

Indeed, is the addressee rich and handsome?—Boston Courier.

ARRIVAL OF THE BABY.

How the Joy of Parental Love is Exhibited in Birth Telegrams.

The reporter found him leaning over the desk at the telegraph office. There was nothing about him that would have attracted attention, except that his strange troubled look in his eyes and the reckless way he was destroying Mr. Gould's telegraph blanks. He would take up a blank, cut off a line or two, hold it at arm's length, slowly read it to himself, and then crumple the dispatch in his hand and try it all over again. On the sixth round a glad smile told that he had found the thing to his satisfaction, and the next moment he stretched his neck and loudly asked the charges to Kalamazoo.

A wan smile crept over the erstwhile customer took his change and hastily slid out the side door.

As the reporter approached the smile deepened.

"What's that," said the clerk slowly as he glanced about the office to see that no one was about.

"You did?" said the reporter, gently yet firmly.

"Yes, this is the fourth one to-night, too. Listen," he added, as he pinned his merciless gaze on the blushing night message for Kalamazoo:

"It's the little stranger arrived safely to-day, reached post office at the clerk's fine."

"The boy's. Kindly name your beverage and send damages to CHARLEY."

"Yes," went on the clerk, speaking as though he were equal to the occasion, "this is plain, straight, and to the point."

"It is a year or two, and I think you'll agree with me that he led up to the climax very well indeed. He almost forgot—well, something decidedly important; and rather than have the old folks at Kalamazoo, the aunts and uncles and sixteenth cousins live in a state of bewilderment, notice how gracefully he rings in the crisis:

"It's a boy."

"Now, then, here's another handed to me just a little while ago. It comes entirely in a different vein. It is addressed to a gentleman in Toledo, perhaps an old chum:

"Well, well! well! I told you so! I shall name him after you. He was run for president in 1904, or not, I am not sure."

"TOM JACK."

"Now, that's what I call neat," said the clerk, as he laid aside the tender message destined soon to gladden some heart in far off Toledo. "One cannot be too quiet, as you see, Tom Jack, is quite a humorist. He spares himself the embarrassment of saying anything about the little angel's sex. He doesn't say whether Sally is doing well or not; Tom Jack is too much related to think of these things; and, as you see, so he comes in again, but his dispatch won't be so intrepid. Later still, when the family circle is extended so that the hired girl puts a couple of extra boards in the table for dinner every day—well, Tom Jack, the man, with family man, is running higher and higher year by year, won't be in such a tremendous hurry to turn loose the electricity for arrival No. 7. We can all wager the nimble dollar on it."

"Shall I read the other two? Well, they're not quite so demonstrative. One reads:

"Baby came to us this morning. Blue eyes like its mother. Mother mending just."

"And the other reads:

"Our daughter joined us this morning at 10:30. Will you come to christening? Irene sends love to father."

"FREDRY J."

"You can see by these that there is quite a literature in the birth message. The main points that seem to nagitate the fond young papa's breast are to tell the little story fully, yet suppress any direct statement of the child's sex, and to thank the doctor for his help. It's always a great mental torture to 'em when I slowly count over the words one at a time. It makes them squirm to think that the doctor's words might not be plain, and that I might run out the dispatch and ask him if it's all right as I read it. But I've too much consideration for human nature to do that; and whenever I see a young fellow slide into the office, cautiously grappa pen and experiment on half a dozen blanks, my experience tells me at once what's in the wind, and I am careful to let him depart in peace through the side door in the shortest possible time."

And as the reporter was moving off the clerk picked up another blank and read it over softly to himself. There was no smile on his lips this time as he turned over the words, but a look of gloom.

"Here's another message, side by side with the little harbingers of gladness I read you a moment before. It's only a one, but there is nothing so eloquent as this:

"John died when the tide went out to-night."—Detroit Free Press.

Brush with a Wildcat.

Elder Goodrich had an exciting experience in the State of New York.

A dark night last month. He was riding a horse along an old log road, on his way home from Moose, when a wildcat sprang from the bushes with a growl, gave two or three leaps, and seized the horse by the neck. Goodrich kicked at it as hard as he could until it let go and dropped in front of the running horse.

He didn't hear anything more from the wildcat, and after he had quitted the horse and latched him to a tree, he went back, struck some matches and searched for the savage beast. The wildcat lay in the brush, with a crushed skull, the horse having apparently trod upon it as it fell.

—Scranton Cor. New York Sun.

SHUTTING UP HER FOLD.

The fire burns dimly on the hearth. The light is turned down low; and watery rays through bare old trees in the forest of life.

The mother pulls the curtains down to keep away the cold.

Then she looks at the children's beds—She's shutting up her fold.

She covers up the little hand "Thy own of the corner."

She wipes the place on baby's cheek "Which one stray tear had wet."

Kindly in the night, slowly "And smooths the hair of gold."

Then kneels and "prays the Lord to keep"—She's shutting up her fold.

Oh, little ones, fenced round secure "With mother's love and care."

What looks of peace and trust and joy "Your sleeping faces wait."

Outside to-night some children, who "One small stray tear had wet."

Are wishing they could be once more "Sheltered in mother's fold."

—Kansas Trail Perry in the Home Maker.

HOW BABIES' FEET ARE SPOILED.

Mothers Inflict Torture on Their Little Ones So That Their Feet May Look Pretty.

"Now stamp down your foot, dear. That's it. That shoe is too large. Let me see a size smaller."

"Really, madam, if you take my advice," began the shoe-maker, but madam cut her short.

"I want a smaller shoe. That one fits like a sack."

The smaller shoes were put on the child, a pretty little tot of about 3 years of age. They fitted tightly and showed that the foot was a very small one, but they pinched the little toes and hurt it.

"Mothers exhibit more vanity than judgment in their selection of shoes for their young children," said the shoe-maker, after the lady had disappeared to a reporter who wanted a pair of russet ties.

"One will bring her baby here and try a pair of shoes on it to make her 'best'." I know what that means and an always sorry for the baby, who is usually in its first short dress, and as skittish as an old maid about having its feet cramped with, I don't say I am going to put a shoe on it a size larger than the foot seems, but I do; at least I get it on as well as I can when the foot is operated by a mother's hand.

Then I trust to the mother's sense for results. If her first baby she will be indignant and say that she doesn't care to trouble to look sloppy in his shoes. They must fit exactly or she won't take them. I tell her that the child's weight will push the foot out at least one-fourth of an inch, and that she's in for it, right.

If she objects again I give up and find what she wants. The little foot is squeezed into a tight shoe and the baby objects by squalling. She says the squall is fretting or hating, but usually naps, and declares the shoes are just lovely and papa will be delighted.

The chances are that when she wants an other pair she'll leave the baby at home and bring down the old pair literally bristling at the toes. She wants several pairs to take home for trial, and I notice that the only one she wears is the one she selected.

Children would have better looking feet if they had wide mothers, and the fault lies in the first shoes worn. One pair too short will ruin the feet, no matter how loose subsequent ones may be.

"Then some women accept your advice?"

"Yes, after the little people have laid the foundation for their feet, I know many children between the ages of two and three years who have both these afflictions because their mothers wanted them to look well."

"Is there no change in the shape of children's shoes?"

"None. There can't be, because the shoe must be sufficiently broad to stand the wear and tear. Square toes are preferred to round, because they allow freer development of the toes. In European countries they make the very stylish shoes for children. They will have bells, pointed toes, patent leather tips and so forth. Some mothers buy them here, but the plain common sense shoe is the best, and the children when they grow up will appreciate the fact by having perfectly formed feet, free from corns. The spring bed introduced a few years ago is now worn by children as young as two years old, but more fashionable for children in their teens. It is nothing but a strip of leather inserted between the sole and that part of the shoe pressed by the wearer's heel. It is seldom that a smaller than No. 8 is made with a regular heel, and that on the common sense plan—low sole."

"How are babies' shoes numbered?"

"No. 4 is the first size out of babyhood. No. 5 has a soft sole of white kid and pasteboard, and all the little bottle heel water, seldom that a smaller than No. 8 is made with a regular heel, and that on the common sense plan—low sole."

Those are worn by babies in long dresses. No. 1, 2 and 3 have what is called the turned sole, sewed together on the wrong side and turned inside out. There are from four to five buttons on each side, and a black laced is now fastened at the top in front. The latest idea has a vamp of French kid, with calf uppers, or what is called the half boot, which is laced up to the ankle with a half inch of leather, a New York Mail and Express.

Miss Bottle.

"I would like to tell the little people how to make something pretty. Take a bottle hold, and add three drops of rose water, with a long neck, such as an old beer bottle; give mamma to give you one of her old stockings cut out, cut off the foot and gather the leg with a needle and thread, and stretch it in the top of the bottle, or rather an inch from the top; now, with a stick, poke the rest of the leg inside the bottle."

The stocking leg should be as long outside the bottle as it is inside. Wet the inside and all the bottle heel water, roll in the line, dry, taking care to have the sole adhere evenly all around; hang in a warm, sunny place, and fill the bottle with soft water to keep it from drying out at the same time, but be careful not to wash the seeds out of their places, and in a few days your little girl will have a beautiful green moss; but you must keep the stocking moist, or the seed will not grow.—Western Rural.

Apples of Gold in Pen Pictures.

Martyrdom is grand, but the martyr's loss.

Satan is not wont to array himself on the losing side.

There are some victories that are worse than defeats.

It is the way of the world unto this day to be made to mistake.

A little shining chaff debates feminine nature better than all handful of solid grain.

—The Lord commanded us to love our neighbors as ourselves, he did not say we should love ourselves.—Rose Terry Cooke in Steadfast.

Beauty shows it, appears, not quite a naïveté. The International des Chateaux describes one held at Paris in 1905, in the memories of the oldest competition of the kind, the prizes were golden apples. The first prize, of course, awarded to the Queen of France, and the second was obtained with 1,725 points by a Miss, Semure. Most of the prizes were given to ladies from Normandy.

CEMENT FOR BROKEN IRON.

By a new method of cementing on the part cemented is so effectively joined as to resist the blows even of a sledge hammer. The cement is composed of equal parts of sulphur and white lead, with a proportion of about one sixth of borax. When the composition is to be applied it is wet with strong sulphuric acid, and a thin layer of it is passed between the two pieces of iron, which are at once pressed together. In five days it will be perfect, though the cement having every appearance of welding.

For some years the Italians have been trying to obtain a footing on the African side of the Red Sea, and have been keeping up a warfare with the Abyssinians. A recent official return shows that the little Italy has cost the Italian treasury over twenty millions of francs, and there is neither military glory nor acquired territory to show for the money.

TO THE DEAF.—A Person cured of Deaf-

ness and noise in the head of 23 years' standing by a simple remedy, will send a description in a FREE to any Person who applies to NICHOLSON, 30 St. John St. 1st fl.

Malangany and ebony are being used for railroad ties on a some of the Mexican lines. This looks like a waste of valuable material, but these woods are really a little more valuable in Mexico than pine is in Canada.

The farmer who uses his brains as well as his muscle in his daily work will succeed, if such a thing is possible in the days of low prices and limited market. He should understand the value of any of his readers, and if he entrusts his work to help this knowledge is especially needed.

CONSUMPTION SURELY CURED.

TO THE EDITOR:—Please inform your readers that I have a positive remedy for the above named disease. By its timely use thousands of hopeless cases have been permanently cured. I shall be glad to send two bottles of my remedy FREE to any of your readers who have consumption if they will send me their express and P. O. address.

Respectfully, DR. J. SLOCOM,

164 West Adelaide st., Toronto, Ont.

Oil is made from black birch twigs at Mystic, Conn., which is the best. A ton of branches will produce only three pounds of oil. The men are employed in gathering and extracting. The oil is worth \$8 a barrel, and is used by confectioners in making wintergreen flavors.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had Children, she gave them Castoria.

"Tommy," said his mother, "do you think you'll get a prize at school for being good?"

"No'm," said Tommy. "Why not sir?"

"I asked his father, sternly laying down his paper, 'dear me, you're a fine fellow,' answered Tommy, meekly.

CATARH.

CATARRH DEAFNESS—HAY FEVER

A NEW HOME TREATMENT.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research, however, has proved this to be a fact, and the result of this discovery is that a simple remedy has been formulated whereby catarrh, catarrhal deafness and hay fever are permanently cured in from one to three simple applications made at home by the patient once in two weeks.

N.B.—This treatment is not a snuff or an ointment; both have been discarded by reputable physicians as injurious to the nasal membrane.

A pamphlet explaining this new treatment is sent on receipt of ten cents by A. H. Dixon & Son, 303 West King Street, Toronto, Canada.—Toronto Globe.

Sufferers from Catarrhal troubles should carefully read the above.

BELL

PIANOS & ORGANS.

Messrs. W. Bell & Co.,

Guelph, Ont.

The Bell Piano in use at the Toronto College of Music has proved to be a very satisfactory instrument. Tone, touch, and general finish being excellent.

(Signed) F. H. THORNTON,

Director, Toronto College of Music.

BELLEVILLE, Feb. 20th, 1889.

Dear Sir:—The Bell Piano which I bought from you a few months ago continues to give great satisfaction. Its depth of tone, and power, its brilliancy and sweetness make it always a delight to play upon. There is that peculiar "singing" quality about its notes which produces a lovely effect. As regards the mechanical work and finish of the case and action, they seem to be above criticism. Indeed, I have never yet seen a Canadian Piano and very few American ones, which would at all compare in my estimation with the Bell Piano.

However, is shown by the fact that I have selected one of them, in preference to all others for my own use and pleasure.

Yours truly,

DAVID F. BOGART,

Rector of St. John's Church.

H. BULL, Agent,

Box 89, Belleville, Ont.

IDEALISM.

If in the dawn of the daylight,
If in the dawn of the spring,
Between life's bliss and its gray light,
Joy doth some glad hours bring.
Hold them not less for their seeming,
Close to them cling for delight,
Though these be but daylight dreaming,
And the rest be but dreams of the night.

All things but come in a gleam,
Are bubbles that last on the stream
Of time, for thus art the dreamer.
And life itself is but a gleam.

—Benedict Bellman in Philadelphia Times

Made a Compromise.

"Can I see you a moment in private?"
queried a middle-aged stranger of Officer
Button at the Third street depot a day or
two ago.

"You can, sir. What is it?"

"It is the first time I was ever placed
in this position, and I feel very much
embarrassed."

"Exactly."

"But the truth is I've been robbed and
want to ask you for the loan of a dol-
lar."

"Where were you robbed?"

"On the train."

"How much?"

"Just \$23.00 in cash."

"Was that all you lost?"

"Every dollar. If you could now lend
me a dollar I would try and get a fresh
start in the world."

"It wouldn't be business," replied
Button, after a little reflection. "You
might accumulate another fortune and
again be robbed of it and it would be
encouraging crime."

"Yes, that's so. I hadn't taken that
view of it before. Suppose you give me
a quarter. I will give you my word not
to attempt to get a fresh start on that
and expose any one to temptation. I see
how very wrong it would be, and I've de-
termined never to accumulate another
fortune."

On his solemn promise to this effect
Button compromised with him for ten
cents.—Detroit Free Press.

Where Enemies are Beneficial.

"To succeed in literature it is better
to have many more good enemies than
good friends. Good friends are like
men who fire of their love, they forget
rapidly; but good enemies are like for-
saken women, who pursue us even be-
yond the grave." This sentiment,
scrawled at random on a loose sheet of
paper in an elegant, aristocratic hand,
was not penned by a cynical French-
man, trying to emulate La Rochefou-
cauld, but by a genial Galician, the au-
thor of a series of charming stories and
novellets, who, with the *Beside the*
and *Dostoevsky*, has from his debut
won for himself a European reputation
—the clever and prolific Sacher Masoch.
—London Cor. New York Sun.

Screen.

There are persons possessed of such
wonderful self poise and serenity of
soul that they never give way to the
vulgar excitement of less evenly bal-
anced persons.

A story is told of an old Quaker lady
who was informed by a wildly excited man
that her house was on fire.
"It is," she said, rising calmly and
dropping her knitting into her pocket,
after she had carefully wound the loose
yarn. "I thank them for the informa-
tion, and now if they will just go and
sound the alarm, I will take my pious out-
fit of the oven, and be ready to tell the peo-
ple what to carry out first."—Youth's
Companion.

Early Bridges.

The first bridges were of wood, and
the earliest of which we have any ac-
count was built in Borneo 200 years B. C.
The next was erected by Julius Cæsar
for the passage of his army across the
Rhine. Trajan's great bridge over the
Danube, 4,770 feet long, was made of
timber, with stone piers. The Romans
also built the first stone bridge, which
crossed the Tiber. Suspension bridges are
of remote origin. A Chinese one men-
tioned by Kiroch, made of chains sup-
porting a roadway 800 feet in length, was
built A. D. 65, and is still to be seen.
The first large iron bridge was erected
over the Severn in 1777.—Chicago Ledger.

Collecting Tax.

Tinker's Island, used to be the town col-
lector of Mr. Desert. If he didn't get his
money the first time he called, he had
an original way of helping the delin-
quent to remember that he would come
again. Taking a piece of chalk from his
pocket, he would write on the wall the
word "Tax" on the woodwork of the room in
large letters; and the authority of the
official is said to have been acknowledged
so well that the chalk was allowed to re-
main there till time of the payment of
the tax had rubbed it off.—Lewiston
Journal.

Then Pione.

A friend of mine who was giving a
large dinner once called on old T., the
negro caterer, to arrange the dinner and
take the trouble of waiting on it. "Yes,
mam," said T., "I'll look out for it all
right," but I want to know who de com-
pany is. Is there any clygemmen and
then kind a comin'?" "Certainly," said
my friend, "but why do you ask such a
question?" "Oh," said old T., "if they
clygemmen and that sort comin', you
must get more to eat and drink. Them
pious eat tremendous!"—Blackwood's
Magazine.

Unbridled Nostalgia.

"Prisoner," said the justice, kindly,
but firmly, "I will have to send you to
jail for sixty days. It is pretty hard to
deal harshly with a young man!"
"Say no more, your honor," interrupted
the prisoner, hastily; "make it ninety
days and I'll thank you. I'm a league
unhappy, and—"
"Six months at hard labor; take him
away," said his honor, whose son was
playing extra for Washington.—Burdette
in Brooklyn Eagle.

Lord Tennyson devotes the pension of
\$1,000 a year which he receives as poet
laureate to the relief of members of the
literary profession who are in pecuniary
distress.

CLAY THEIR DAILY FOOD.

SUCH IS THE DIET OF A CURIOUS
SET OF PEOPLE IN ALABAMA.

A Peculiar Complexion Seemingly the
Only and Chief—How the Clay Eaters
Live and Get Their Daily Clay—One of
Them Interviewed to Little Purpose.

"Those people are clay eaters."

The people referred to were a group of
men and women of various ages who
had gathered at a country store in Win-
ston county, Ala., to gather a few eggs
and chickens for coffee and tobacco.
They were poorly clad, men and women
were barefooted, and three children in
the party were pale and haggard, and in
their eyes was a dull, hopeless look, showing
that they were not only densely ignor-
ant, but without ambition to better their
condition in any way.

After attending to the wants of these
strange strangers, informed the writer
that they belonged to the poorest class
of mountaineers who inhabited that sec-
tion, and that white clay was a part of
their regular diet.
The writer spent several days in Win-
ston county recently and visited the
homes of a number of these people who
eat clay as a part of their daily food.
They live in small log cabins of the rude-
st kind, and seek out a miserable exist-
ence by farming, hunting and fishing.
Their farms, or patches as they call them,
are small clearings around their cabin
and a few acres in extent. Their crops consist
of corn, peas, potatoes, and a few who are
fortunate enough to own a horse attempt
to raise a little cotton. The land is very
poor, and the crops are consequently little
more than a waste of labor. Men, women
and children are slaves to the tobacco
habit. The women chew and smoke
and most of them also use snuff when
they can obtain it.

THE ANTOPE OF CLAY EATER.

The interior of the cabin of a clay eater
is rude in the extreme. The cabin is
usually built of small pine logs, from
which the bark is sometimes removed.
There are no windows and usually only
one door. There are no pictures on the
walls, no ornaments of any kind and
often no furniture worthy of the name.
If there are beds they are of the crude-
st kind, made by the head of the family
with a few boards and a sack of straw
and an ax. Usually the cabin is too
small for beds if the family is large,
and they sleep on quilts and mattresses
spread on the floor. The entire family,
often ten or more persons, eat and sleep
in one small room.
In the one fireplace, the stoves consist-
ing of a frying pan, a kettle, an oven
and possibly a few pots. Cooking stoves,
sewing machines and all modern conven-
iences are unknown.

The clay eaten by these people is found
along the banks of the small mountain
streams in inexhaustible quantities. It is
of a dirty white color usually; sometimes
a pale yellow. It has a peculiarly oily
appearance, and this oil keeps it from
sticking to the tongue or mouth. When
it does not crumble to a few degrees of
water will easily soften it until it can be
rolled into any shape desired. It is almost
without taste, but must possess some
nourishment, as these people declare they
can subsist upon it for years. They place
small pieces in the mouth and hold it
there until it gradually dissolves, and is
swallowed in small quantities at a time.
The quantity eaten at one time varies
from a lump as large as a pea for the
child, or beginning to a lump as large as
a hen's egg for those who have eaten it
for years.

A CLAY EATER INTERVIEWED.

"How did you learn to eat clay?" I
asked of a man whose face was almost
the color of the clay he was eating.

"Dunno," he answered. "I seen pap-
pe and 'others eat it, an' I got at it."

"Does the habit grow until you acquire
a taste for the stuff?"

"Huh!"

"Can you quit eating clay?"

"Dunno; never tried."

"Has the stuff a pleasant taste?"

"If 'twant good I wouldn't be eatin' it,"

and the native drew a second lump from
his pocket and began to eat it with a
reluctant.

The only bad effect of clay eating seems
to be the peculiar appearance it gives the
skin of those who become addicted to the
habit. The skin turns pale, so pale, in
fact, as to give the face the pallor of
death, and the hair turns a mousy, pe-
culiar pale yellow, a color closely re-
sembling some of the clay eaten. Child-
ren who become addicted to the habit
grow old, at least in appearance, prema-
turely, and the face loses forever the
bright glow of youth and health. There
is little sickness among the clay eaters,
and they live as long as the average of
mankind, so it is conclusive that the
habit is not fatal in its effects.

It may or may not be the result of clay
eating, but these people are as superstiti-
ous as the black followers of a voodoo.
They have signs for everything and al-
most worship the moon. Corn is planted
when the moon is full, and potatoes are
planted in the dark of the moon. They
will not start on a journey or begin a job
unless the moon is right, and they fore-
tell storms and all kinds of disasters by
the appearance of the moon. If one of
a new moon is lower than the other it
will rain before the moon changes again,
say the clay eaters, but if the moon is
level there will be no rain until another
change occurs.—Macon (Ga.) Telegraph.

On Their Heads.

In France, when a patient is under
chloroform, on the slightest symptom
appearing of failure of the heart, they
turn him nearly upside down, that is,
with his head downward and his heels
in the air. This, they say, always
restores him, and such is their faith in
the efficacy of this method, that the op-
erating tables in the Paris hospitals are
made so that in an instant they can be
elevated with one end in the air, so as
to bring the patient into a position re-
sembling that of standing on his head.—
Boston True Flag.

Disease of the Heart.

In diseases of the heart, which persist
for a long time and finally end, as a very
large proportion of them do, in slow de-
cline and a lingering death, dropsy al-
ways sets in. In the late stages it is a
most intractable symptom, and adds
greatly to the suffering experienced. In
the treatment, physicians have been
wont to depend largely upon a diet of
milk, which, in cases where it is well
borne and can be persisted in, is very ad-
vantageous. But there are many patients who,
for various reasons, cannot be kept on a
milk diet for any length of time. To
some it becomes abhorrent after a while,
and others are unable to digest it properly,
as simple food as it is. And besides,
a milk diet is really unsuited to no
small proportion of patients affected with
cardiac diseases. We have reference to
those who cannot be kept quiet, but in-
sist upon being up and about, often in
the open air, if not engaged in light
duties.

Professor Germain See, of Paris, has
long been engaged in study to learn
what elements in milk render it such an
admirable agent to stimulate the kid-
neys, increase the flow therefrom and
hence prove of such great service in
dropsies. As a result of his investiga-
tion he is convinced that the one im-
portant element is sugar of milk. Acting
upon that theory he selected twenty-five
patients with heart disease, in all of
whom there was more or less of dropsy.
To each he gave 100 grammes of the
sugar of milk a day, dissolved in two
quarts of water. In all these cases a
marked effect upon the kidney was
seen, and within twenty-four to forty-five
hours, and the dropsies diminished rapidly,
and almost all such swellings dis-
appeared altogether after a series of
treatments lasting from six to eight
pays. This discovery is of little value
as a cure, but it is of the greatest im-
portance in the medical world which has
been made in the medical world for
years.—Boston Herald.

Ape and Looking Glass.

A looking glass is a mystery, an ob-
ject of intense interest to many animals,
and it is often very amusing to watch
their maneuvers. Professor C. Robert-
son describes the behavior of a large ape
in the Jardin des Plantes.
He was in an iron cage looking it over
some smaller monkeys. Ferns and other
things had been thrown between the
bars, which the ape attempted to seize.
At length a small hand looking glass,
with a strong wooden frame, was thrown
in. The ape got hold of it and began to
brandish it like a hammer, when sud-
denly he was arrested by the reflection
of himself in the glass.

After looking puzzled for a moment,
he darted his head behind the glass to
find the other ape, which he evidently
supposed to be there. Finding nothing,
he apparently thought that he had not
been quick enough in his movements.
So he raised and drew the glass nearer
to him with great caution, and then
with a series of jerks, he looked at it
in. The ape got hold of it and began to
brandish it like a hammer, when sud-
denly he was arrested by the reflection
of himself in the glass.

A Dutch Jtalk.

She was massively built of varnished
oak, with bows so bluff as to be almost
square, a straight sided box, made, like
all Dutch craft, to slide over the water
with a series of rollers, and with them
men wing like lee boards on each side
to let down and supply the place of a
keel when going to windward. A tall
mast bore a lofty narrow headed main-
sail with a short curved gaff, and a fore-
mast with a shorter boom. The great red-
dye bore along its upper edge a grotesquely
carved and gaily painted lion couchant,
the most common of all the rudder de-
corations and of as much importance as
the familiar figurehead in seagoing ships.
Hull and spars were brightly varnished,
with casings of polished brass, and rings
and scrolls of red and blue paint where-
ever there was room. The staves of the
water barrels were green and white, and
marvelous landscapes were painted on
the ends. There was a neat raised cabin
at the stern, gaily ornamented in green
and yellow, with little white curtained
flower decked windows, through which
one caught glimpses of a spotted doll
and a pair of bright red shoes. The im-
pans and quaint shapes of blue and brown
earthen vessels. Of course all the items
of household life—cooking, washing, the
baby's toilet, and so on—were performed
in the most open and unconcerned man-
ner on deck.—Blackwood's Magazine.

Saving a Life.

An old soldier, a lieutenant during the
civil war, was walking down the street
of a town, when he saw a poor, thin, old
man, a fellow, half soldier, half beggar,
who made him a most reverential salute.
"God bless your honor," said the man,
whose speech betrayed him for an Irish-
man, "God bless you and long life to you."

"How do you know me?" said the lieuten-
ant.

"Is it how do I know you, your honor?"
responded the poor fellow, "I know you
because you saved my life in battle."

The lieutenant, gratified at this tribu-
te to his valor, slipped a fifty cent piece
into the fellow's hand, and asked him
when.

"God bless your honor and long life to
you," said the now doubly grateful veter-
an. "Sure, an' it was at Antietam,
when, seeing your honor run away as
fast as your legs would carry you from
the rebels, I followed your lead and ran
after you out of the way, whereby, un-
der God, I saved my life. Oh, good luck
to your honor, I'll never forget you."
—Youth's Companion.

HOSPITAL REMEDIES

WILL GIVE YOU HEALTH

A NEW DEPARTURE IN MEDICINE

The four greatest medical centers of the world are London, Paris, Berlin and Vienna. These cities have immense hospitals teeming with suffering humanity. Hundreds of students through the world studying under the Professors in charge. The most renowned physicians of the world teach and practice here, and the institutions are storehouses of medical knowledge and experience. With a view of making this experience available to the public the Hospital Remedy Co. at great expense secured the prescriptions of these hospitals, prepared the specifics, and although it cost them \$25 to \$100 to secure the attention of their distinguished expirators, yet in this way their pre-
parand specifics are offered at the price of the cheap patent medicines that flood the market and absurdly limit to cure every ill from a simple cold to the most dangerous diseases. The Hospital Remedies make no unreasonable claims. The specific for CATARRH is cured by No. 1, while troubles of DIGESTION, STOMACH, LIVER and KIDNEYS have their own cure. To these is added a specific for FEVER and AGUE, one for FEMALE WEAKNESS, GENERAL TONIC and BLOOD-MAKER that make a big and GIVES FORM AND FULLNESS, and an incomparable remedy for NERVOUS DEBILITY.

NO. 1—CURES
CATARRH, RHEUMATISM, GOUT, GRAVEL, NEURALGIA, MIGRAINE, BRUISES, SCALDS, BURNS, SORES, WOUNDS, AND ALL AFFECTIONS OF THE SKIN. This is not a snuff or ointment—both are discarded as injurious. \$1.00.

NO. 2—CURES
CATARRH, DEAFNESS, COLIC, BRONCHITIS, ASTHMA, CONSUMPTION—An incomparable remedy; does not merely stop a cough, but eradicates the disease and strengthens the lungs and restores wasted tissues. \$1.00.

NO. 3—RHEUMATISM AND GOUT—A distinguished and well-known specialist in Rheumatism in Paris. He treats nothing else, but his reputation on this remedy. \$1.00.

NO. 4—LIVER AND KIDNEYS, DYSPEPSIA AND INDIGESTION, CONSTIPATION AND BILIOUSNESS—A fourfold disease—cure for the quack who has ruined more stomachs than alcohol. Use a remedy mentioned in this paper. \$1.00.

NO. 5—FEVER AND AGUE—DUMB AGUE, MALARIA, NEURALGIA—We know what grade damage this does the system; it is tried to break it for a time. Use a remedy that eradicates it. \$1.00.

NO. 6—FEMALE WEAKNESS, IRRREGULARITIES, WHITES—Many women die of this disease. The Hospital Remedies cure it, and who expose you by selling your confidential letters to others in the same manner. Use No. 6 and regain health and strength. \$1.00.

NO. 7—HEALTH, FORM AND FULLNESS depend on good blood and lots of it. If weak, if blood is poor, if scrofulous, use this perfect tonic. \$1.00.

NO. 8—NERVOUS DEBILITY, LOSS OF POWER—A quick cure—ridges public will hold a genuine remedy for an unfortunate condition. No. 8 is golden, which one trial will prove. Scores of important quacks who charge high prices for cheap and worthless drugs and pills, the properties of which they are a victory against, and who expose you by selling your confidential letters to others in the same manner. Use No. 8 and regain health and strength. \$1.00.

TO EE HAD OF ALL DRUGGISTS.

If your Druggist does not keep these remedies on hand, write to us and we will ship you directly. New bottles, 50¢ each. Old bottles, 25¢ each. We send them in original Hospital Remedies which emanate from scientific sources and they prove your life.

B. J. Atkinson.

BETHEL.

From Our Own Correspondent.

Mr. Will Parks has returned to Rochester,
N. Y. He has taken his mother and
sister with him. Will says he wants them
to see something. (Good idea Will.)

Mrs. John Robinson has been away on a
visit to friends in Kingston and vicinity.
She enjoyed her trip very much.

Pro growers are beginning to sell. Mr.
Crawford shipped about five tons on Satur-
day, the prices are very low and barley is
worse, so we ought to get cheap beer this
year.

Mr. John Crawford has been away
spending a few days with friends in Shan-
nonville.

Mr. Hallett Gosselin lost a horse last
week.

Revival meetings still going on here yet.
The Rev. Pickett preached a missionary
sermon here on Sunday last.

TYNDINAGA RESERVE.

From Our Own Correspondent.

Elas Green, of the Slash road, has pulled
down his log house and is erecting a com-
modious frame cottage, we hope he may long
enjoy his new quarters.

Andrew Culbertson has moved upon
David Smith's farm which he is going to
work for his nephew, W. C. Brant, who has
leased it.

Chief Koughtlet's success as a physician
has aroused the envy of medics about
Waterbury, Conn., who threaten to prosecute
him for practicing without a license.

Thomas Harrison, one of our west end
tenants, is about to pull up stakes and re-
turn to Manitoba. The farm he vacates
will be taken by young Juppings of the
Slash road.

If the schools are to be kept open coal
should be provided and a little patchwork
done.

Henry McCullough has taken the Charlie
Maracle farm formerly worked by
Isaac Fowler.

County council repairs to the York road
Sucker Creek bridge have made it firm and
safe to drive over.

One of our young ladies was seen last
week walking west with Chief Ginyou. We
hope she was not under arrest but it looks
suspicious.

Andrew Kimmerly and Brown are fishing
a few rods west of the grain dock. They
have built a comfortable phanty. We expect
their title is rather questionable.

MARYSVILLE.

From Our Own Correspondent.

Dokos, Deary, Esq., arrived from North
Dakota on Tuesday.

Miss M. J. Ryan came home from Water-
town, N. Y., recently.

Miss McCullough, of Napanee, spent Sunday
with Miss Brimscombe.

Miss Rose McKenty is spending a few
weeks with friends at Hark's.

Mr. Wm. H. Allison, of the C. P. Ry.,
Toronto, and wife, have been spending a
few days with the folk here.

The price of barley is low and no prospect
whatever of rising. The price in the U. S.
markets is low and likely to continue so.

Mr. P. McAlpin, of Shannonville, intends
working his farm himself next season. Mr.
Driscoll, the present tenant, removes to the
Drumsey farm adjoining that of Mr.
McAlpin.

SHANNONVILLE.

From Our Own Correspondent.

Mr. & Mrs. F. Pagan and Mrs. Dr.
Walker, attended the fair in Napanee on
Wednesday last week.

Mrs. Edie Pennick took in the fair at
Shannonville on Wednesday last.

Mrs. & Mrs. R. L. Lazier, returned home
on Saturday last from Manitoba where they
have been visiting their daughter Mrs. W.
J. Emerson. They report Mr. Emerson as
being well pleased with his new home.

Mr. Walker has again been making exten-
sive improvements both to his residence and
out buildings.

Several members of our Royal Templars of
T. Attended the District Council in Belle-
ville on Friday last.

The Women's Missionary Society will hold
their meeting the first Wednesday in every
month; the next regular meeting will be
held Wednesday Nov. 6th.

At the County Council held at the Ontario
Voters Lists Acts in Shannonville, on Sat-
urday the 12th inst. there were added to the
Voters List for the municipality 31 names,
12 of which will vote for the Government
and 19 for the opposition, and there were
struck off the list 15 Government and 10
opposition names.

The Rev. Pickett preached a missionary
sermon here on Sunday last.

VOTERS' LISTS COURTS.

To the Editor of the TRIBUNE.
SIR.—The Courts for the revision of Voters
Lists under the Electoral Franchise Act for
East Hastings, will be held as follows:—
Shannonville, Nov. 11th; for the Shannon-
ville, Indian Council House and Marysville
polling districts at Shannonville, Nov. 12th;
for the balance of Townships, at Melrose,
Nov. 14th; for the Thompson, Money-
mors and Marlbank polling districts at
Thompsonburg, Nov. 14th; for the balance of
Townships, at Deseronto, Nov. 15th; for the
Thompson, 2nd con. and lower Cautin polling
districts, at Cautin, Nov. 15th; for the
upper Cautin, Corbyville, and Puffer's
polling districts at Cautin, Nov. 19th; for
"Ross Corners," Pochoro, and Zion's Hill
polling districts, at Pochoro, Nov. 20th.
All courts open at 10 a. m.

All suitors to strike names off the list or
add thereto, &c., &c., must be left with or
mailed to the Returning Officer, Belleville,
not later than 14 days before each of the
above Courts.

Yours, E. B. Frazer,

Returning Officer.

Oct. 14th, 1889.

HANG UP YOUR WATCH.

When not carried in the pocket watch
should always be by its tag in the same
position as it is worn. As a rule watches
will run with a different rate when laid
down. Only high grade watches are adjust-
ed to positions and will show only a few
seconds difference in twenty-four hours,
while common watches may be out of time
several minutes in one night.—*Sunday
Morning Herald.*

Scribbling books, the best at THE TRIBUNE
office.

Captain Murrell, of the Missouri, rescuer
of the ill-fated Danmar's passengers, has
just received another distinction in the form
of a magnificent gold medal, awarded to him
by the Norwegian government. Captain
Murrell now wears upon his breast six gold
medals and one silver one.

TERRIBLE BOILER EXPLOSION.

Our Lindsay correspondent, under date of
the 10th inst., writes as follows:—

"A shingle mill owned by Jno. Dorey, of
this place, was the scene of a terrible
accident this morning at twenty minutes to
six o'clock, which proved fatal to the only
man, (the fireman), that was around the
mill at the time. Had the explosion taken
place twenty minutes later, when the mill
hands would have been at work, there is
hardly a doubt but that every man in or
around the mill would have been killed.

The explosion was so great that several plate
glass windows in the town nearly half a
mile from the mill were broken to pieces.

A piece of the boiler weighing 150 pounds,
was thrown to a height of over 100 feet fall-
ing on the opposite side of the river and carrying
away the upper part of A. W. Parkin &
Sons' smoke stack. Some pieces of the boiler
and pipes were found at a distance of
one third of a mile from the mill. The
mill building itself was completely demol-
ished and not a vestige of the engine house
remains to be seen. As the only man around
the place was killed the cause of the accident
is unknown but it is supposed to have been
caused by the fireman ignorantly putting
cold water in the boiler after it was heated.

The unfortunate man was found about 30 ft
from the engine house with part of the
injection bell in his hand. A large piece of
iron had gone through his head killing him
instantly. A box car standing on a switch
about 50 ft from the mill was badly wrecked
and pieces of steam pipes having gone
completely through it from end to end. The
scene has been photographed by several
parties and visited by thousands of people.
It is being held to-day and it will no doubt be
shown that the explosion was caused by a
leakage in the boiler and the inexperience of
the fireman.

THE MOUSE WAS MASTER.

A mouse, entering a school in Connecticut,
was the occasion of a divorce between the
teacher and his wife.

Teaching about on the floor, the children
spied him, and a buzz of whispers called the
teacher's attention. "Now, children," said
the, in a kind and motherly way, "keep very
quiet, every one of you. Don't move nor
speak a word if the mouse comes toward you.
It is perfectly harmless."

The scholars were very quiet, and watch-
ed the capers of the mouse breathlessly.
The teacher and teacher's wife, however, were
address, when money ran directly for her,
and began to walk over her feet. This was
too much, and the preaching was turned
into practice which refused to doze, till, as
it were.

In short, the teacher screamed with fright
and ran as if a pack of wolves were in and
pursuit. The whole school became up-
roarious, and the mouse was master of the
situation.

The little fellow was so delighted that he
stood up on his hind legs and danced a horn-
pipe, and then ran through the doorway,
leaving the teacher and her tickled pupils in
a peculiar state of mind.—*Waterbury Press.*

Rev. Dr. Washington Gladden, of Spring-
field, makes this interesting statement: "I
wish to record my own conviction, drawn
from a study of the Bible, that knowledge of
Jehovah and of his people, that the average
editor is a little more fair and Christian
in his dealings with truth, and in his treat-
ment of those who differ from him, than the
average parish minister."

NEWS OF THE DAY.

The Countess of Meath is in Quebec.

Sir Daniel Gooch, the English engineer, is
dead.

A screw factory is being erected at
Lachine, Quebec.

Ex-Queen Natalie has rented a house in
Belgrade for a year.

The late Thomas Workman, of Montreal,
left \$120,000 to McGill University.

The British war ship Anson, which
grounded at Kiel, has been floated.

The corner stone of Gal's new hospital
was laid Tuesday by Mayor Lundan.

A prominent United States naval official
speaks disparagingly of the dynamite gun.

Dr. Falmagne has issued an appeal to all
the world for aid to rebuild his tabernacle.

The Earl of Galloway has been acquitted
of the charge of indecent assault on a little
girl.

The journeying hikers of Newark, N. J.,
went on strike Monday. Five hundred men
are out.

A battle between Cretans and Turkish
troops reported in which the latter were
defeated.

The Messrs. Anderson have cancelled their
contract for the proposed fast Atlantic
steamship service.

Clark & Keene, manufacturers of worsteds
in Philadelphia, have been assigned. They
employed 600 hands.

Judge McKinney was thrown from his
carriage Monday evening at Ithaca, N. Y.,
and was fatally injured.

It is believed in Berlin that Bulgaria has
been allotted to Russian and Serbia to
Austrian spheres of interest.

Mr. P. O'Brien, Q. C. of L'Orignal, has
been appointed to succeed the late Judge
O'Brien in Prescott and Russell.

The city officials, cemetery companies,
undertakers and clergy of London have united
in opposition to Sunday funerals.

An association has been formed at St.
Louis to provide terminal facilities for all
railroads now or hereafter entering that
city.

The New York Board of Electrical Control
has decided that there are about 500 miles of
wires in the city not properly insulated and
which should come down.

William Boeling, of Detroit, proposes to
shut up the Detroit canal at once unless the
city pays him \$100,000 for certain lots sup-
posed to be lying at the bottom of the canal.

The proposed argument before the Privy
Council in reference to the unconstitutionality
of the Jesuits' Estates Act has been in-
definitely postponed at the request of Dr.
Davidson, of Montreal.

OUR BIG DISPLAY OF FURS

At the County Show must have convinced you that we are in shape to do the Fur Trade to perfection. The stock on exhibition at the Palace was **Not All Our Stock** by any means. We had a large stock of Furs still in the Store from which we were selling all day long. Men's Coats and Ladies' Mantles, besides the orders which were taken to be made up from the skins.

IT WAS A BIG FUR DAY WITH US

In fact a very big day all over the house. Don't forget, when you or your neighbors or friends want any kind that Cheapside has a larger stock to select from than all the other stores combined. That Cheapside has sold more good Coon coats and Fur Mantles than any two other stores in the Central district during the last 10 years; that we know a good Fur Garment when we see it and that **You Can Depend Upon What We Recommend to You.** That our best Coats and Mantles are sold under a guarantee of 3 to 5 years, that if we have no Fur Garments ready-made to suit you we can make it to order for you and show you every time.

What They Are Made Of

That we are bound to have you satisfied and pleased with anything we sell you, no matter at what cost to us. We want your influence as well as your custom and good opinion. Now don't think because we go into Furs so extensively that we are furriers exclusively, or that furs is our only strong point.

We Aim to do Everything We Deal in Well,

And to have every department as EFFICIENT as that devoted to Furs. We are determined that Cheapside shall be the rallying point for the army of purchasers in the counties of Lennox and Addington, East Hastings, Prince Edward and Frontenac, or such persons of these counties as are tributary to Napanee.

We Are Strong

Very strong, in Dress Goods; the best range of the nicest goods to be found anywhere.
In Mantle and Ulster Cloths.
In Silks, Satins, Velvets and Plushes.
In Gloves, Hosiery, Laces, Corsets and Yarns.
In Underclothing of all kinds for Men and Women.

We Are Strong

In Shawls and Ready-Made Ulsters and Jackets for Ladies and Children.
In Gents' Furnishings, Cloths, Tweeds and Overcoatings.
In Staple Goods of all kinds.
In Plushes of all kinds, Blankets, Tiedowns, etc.
Particularly Strong in Millinery; trade increasing every day.

A lot of New Celebrated Bostonian Underwear Just Opened; Beautiful Natural Wool Goods.

HINCH & CO., Napanee.

Leaders in General Dry Goods and Millinery.

Special Arrangement through the American Press Association.

CHAPTER III.

run him down." After a moment's reflection, however, Mr. Perry concluded that as he had come so far and was now nearly within rifle shot of the mysterious goal of his morning ride, he might as well let the stranger go, and pushed ahead himself for Dunraven.

The stream bent southward just at the point where he had first caught sight of the horseman, and around that point he knew the ranch to be. Very probably that was one of the ranchmen of whom Mrs. Lawrence had spoken—churlish fellows, with a civil word for money, grins and repellent. Why, certainly. That accounted for his evident desire to avoid the cavalryman; but he need not have been in such desperate haste—need not have kept at such unapproachable bounds, as though he shunned even being seen. That was the queer thing, thought Perry. He acted just as though he did not want to be recognized. Perhaps he had been up to some devilment at the ranch, and the thought gave spur to his speed, and Nolan, responsive to his master's mood, leaped forward along the winding trail once more. The point was soon reached and turned, and the first object that met the eyes was a long row of stakes stretching from the cottonwoods straight to the south up the gentle slope to the prairie, and indicating beyond all question the presence there of a stout and high impenetrable wire fence. There were few things the cavalryman holds in meaner estimate.

"That marks the western limit," thought Perry to himself, "and doubtless reaches miles away to the south, from this I hear. Now, where does one enter?"

A little farther on he came upon a trail leading from the low bluffs to his left hand. It crossed the winding bridge and ran straight on to the south, and the hoof tracks seemed to join, and wheel tracks too. He had marked that between the fort and the point no sign of wheel appeared; it was a hoof trail and nothing more. Now a light and little track wagon came from the north, and while one branch seemed to cross the stream and to ascend the opposite slopes close along the wire fence, the other joined him and went on down the stream. This he decided to follow.

A ride of a few hundred yards brought him to a point where a shoulder of bluff twisted the stream to the south, and he was, he thought to cross and reconnoiter on the other shore, turned Nolan in that way, and was suddenly brought up standing by the heaviest and most formidable wire fence he had ever seen. Yes, it was a wire fence, stretched away through the cottonwoods, straight as a die, back to the angle where the stream turned southward he first had noted, and, looking down stream, far as the eye could reach.

"Well," thought Perry, "I've often heard an Englishman's horse was his castle, but who would have thought of staking and wiring in half a country—half a Texas county—in this hogwash country? How far down is the entrance, anyhow?"

Following the trail, he rode down stream a full half mile, and still there seemed no break. Nowhere on the other side was there sign of a fence, and he was turning to his left in some impatience, he sent Nolan at rapid lope across the intervening "bottom," and soon reached the bluffs, which rose perhaps forty or fifty feet above the stream. Once on the crest, the prairie stretched before him northward, level as a floor, until it met the sky; but it was south he longed to look, and thither quickly turned. Yes, there it lay—Dunraven Ranch, in all its lonely majesty. From where he stood the nearest building stood a good long mile away. That it was the homestead he divined at once, for a broad veranda ran around the front, and white curtains were visible at the door, and the prairie upper floor. Back of it and on the eastern flank were other buildings, massive looking, single storied affairs, evidently stables, storehouses and corrals. There was a tall windmill there—an odd sight in so remote a region—and a big water tank.

Perry wondered how it ever got there. Then at the southwest angle was a building that looked like an office, and he advanced. Hostile Indians there had been none for many a long month, "road agents" would have starved in a region where there practically were no roads, cowboys might, and did, get on for miles and have wild "tears" at times, but who ever heard of their being hostile, man to man? Yet Perry was plainman enough to tell, even at the mile of distance, that the stranger had halted solely to scrutinize him, and, next, to his vast astonishment, that something in his appearance and proved either alarming or suspicious, for the horseman had turned abruptly, plunged through the timber and across the stream, and in another moment, veering that way himself to see, Perry marked him fairly racing into the mouth of a shallow ravine, or "creek," that entered the valley from the south, and there he was lost to sight.

"What an ill-mannered gaboon!" was his muttered comment as he gave Nolan brief chance to trot the juicy grass, while his perturbed rider galloped across the stream in the direction taken by the shy horseman. "I've had a mind to drop the ranch and put out after that fellow. That rascal, however, was very far but how he must soon show up on the level prairie; and I'll bet Nolan could

digged and twisted through the stream bed, rose to the other side, wound through the cottonwoods and then out on the open turf. Huzzat! There it stretched up the slope straight away for the summer, straight through a broad gap between two heavy gate posts standing on the stake line of that rigid fence. Nolan could not but be startled at the sudden neigh of salutation; Perry's eyes glinted with anticipation as he bent over his charger's neck, keenly searching the odd looking stranger for a glimpse of his vision as they neared the fence. Then, little by little, Nolan's eager stride shortened and grew choppy. Another moment, and horse and rider reined up in silent disappointment. Between the gate posts swung a barrier of cobweb lightness, slender and airy as spider web, but bristling with barbs, stiff as a "bullhorn" and unyielding as steel. One glance showed Perry that this impenetrable gate was firmly locked.

For a moment he sat in saddle, studying the situation, while he poked his head over the topmost strand of wire and gazed at respectful distance from the glittering barbs gazed wistfully over the enclosed prairie in search of comrade quadruped who could tell him the manner of place this was. Mountainside his rider was intently eying the heavy padlock that was secured on the inner side of the gate. It was square in shape, massive and bulky, and resembling anything unlike anything he had ever seen among the quartermaster's stores. Dismounting and holding Nolan well back from the aggressive fence with one hand, he gingerly grasped the other with the other, and, with a look of surprise came into his face, he bent down and fastened it, then remounted and ridden away. Here were the fresh hoof prints in the mud, and the rider had dismounted, opened the gate, led his horse through, closed and fastened it, then remounted and ridden away. Here were the fresh hoof prints in the mud, and the rider had dismounted, opened the gate, led his horse through, closed and fastened it, then remounted and ridden away.

Here were the fresh hoof prints in the mud, and the rider had dismounted, opened the gate, led his horse through, closed and fastened it, then remounted and ridden away.

For fifty yards or so the stranger rode confidently and at rapid trot. Perry, too, watching the outturned toes, the bobbing, "bent over" seat, and angular elbows that seemed so strange and out of place on the broad Texan plain. He could not but be startled at the sudden neigh of salutation; Perry's eyes glinted with anticipation as he bent over his charger's neck, keenly searching the odd looking stranger for a glimpse of his vision as they neared the fence. Then, little by little, Nolan's eager stride shortened and grew choppy. Another moment, and horse and rider reined up in silent disappointment. A COUNTRY SCHOOL.

Pretty and pale and tired,
She sits in her stiff chair,
While the blazing summer sun
Shines in on her brow brown hair.
And she looks out for the summer
That she hears through the open door,
Mocked with his marmalade
Tack bench and dusty floor.

It seems an endless round
Grammar and A. G.
The blackboard and the blackboard
The studied grammar, and the
When from teacher to little Jim
Or when from teacher to little Jim
Whether "John" is in any "case,"
Or Kansas in Omaha.

For Jimmy's hair brown hair
He sits to read in the stream,
Where the trout to his luring bait
Shall rise, and his bright gleam;
And his teacher's blue eyes stray
To the flowers on the dark hard
Till her thoughts have followed her eyes
With a half unconscious sigh.

Her heart outruns the clock,
As she smells the faint sweet scent;
Between her time and heart
Their measure in union beat
Like your shadow on the grass,
That lingers far behind,
Or when you find your way past.

Have patience, restless Jim,
The stream and fish will wait;
And patient, dear teacher, wait
Down the winding road to the gate,
Under the willow shade,
Till some one will, fresher flower:
So turn to your books again,
And keep love for the after hours.

AFTER MANY YEARS.

On the extreme point of the Headlands was a ragged boulder, standing, as it were, at anchor, for the salt waves beat in a circle round its base; and on its summit, swinging out with a daring recklessness, was a slender figure, a sturdy youth wearing the rude garb of a fisherman—that was Harry Melville. He broke out into a song—a rude, nautical thing; but the song was good, and the voice was good, and he sang it wondrous clear and resonant, ringing out like a trumpet peal above the dash of the waves, yet sweet and tender as the note of a wood thrush. Over and over again he thrilled the quaint ditty, until every echo caught up the strain, and the whole place and the great sea itself seemed thrilling with melody.

Just then the door of the old farm house swung open, letting out a broad flood of lamp light and a slender girl's figure; and as instant later this self same figure, quant and prim in its gown of gray, stood just behind the singer. He turned, utterly unconscious.

"Harry!"
He was near losing his balance, and his song came to a sharp and sudden end, leaving the closing night in silence. The girl broke into a merry laugh.
"Well, Harry, what's the matter?"
"Nothing—only supper is waiting, and Aunt Sarah is growing impatient," she replied.

"Oh, that's all!" The eager light died out of his eyes, leaving them gloomy and abstract. "I don't want any supper; I've made up my mind; Syria!"
She gave a quick, gasping breath, but face and voice were quiet.

"Well, Harry?"
"Nothing?"
"What?"
"At daybreak."

Her very lips paled, and her slender fingers shook and trembled, but her eyes remained true and steady.
"Well, Harry?"
"Nothing?"
"What?"
"At daybreak."

The boy stood silent, his eyes fixed on the far coast line, where the red sunset fumes were slowly burning out, his thoughts busy with the past. One night, especially, stood out in his mind, and vivid as a wild, stormy night, when the sky was like ink, and the mad sea thundered until the old farmhouse shook to its very center. They were down on the strand, and abstracted, and he had been fishing himself, a sturdy lad, following like a young spaniel. Hard work lay before the man. A stately vessel lay out on the bar, and the strong gale was driving her to pieces.

"But you had started out as her booming guns begged for assistance, but each one was swamped or driven back. It was mere desperation, an old sailor said; no boat could stand such a gale—the thing was to hold on, and wait. His father chuckled to himself, and bringing out a sturdy craft of his own, placed himself at its helm, and went out into the darkness, never to return again, the men averred; but Harry did not believe it. He had never known of father to be so brave, and he had seen the crash and roar to watch and wait. And not vainly, for by and by the sturdy boat beat its way back, bringing only one trophy, a sea wolf that the old man had picked up—a tiny girl child with flaxen hair and blue eyes.

The rough men bore her up to the old farm house, Harry trotting on behind; and before day dawned the booming guns were silent, for the stately vessel, after a brave fight, had gone down beneath the hungry waves.

Capt. Melville and his wife could do nothing more or less than to adopt the little storm girl and bring her up to their own child. So they called her Syria, after all; and as she merged into maidenhood the lads called her the "belle of the coast."

She and Harry had been sister and brother for ten years, eating their frugal supper from the same porringer, and sharing the same bed in childhood.

One day, however, when he was at daybreak and I'm going to the sea," he said, his eyes solemn and tender and his voice tremulous.

The girl stood silent a moment; then putting the question in a low, steady voice: "How far are you going, Harry?"
"When do you expect to come back?"

The Black Dragon's bound around the world, I believe, in youth we were as coming back—well, it will be years before I see the Headlands again, I guess."

Then a sudden light blazed up in his eyes.
"Shall you miss me when I'm gone, do you think, Syria?" he asked.

A swift rose color bloomed in her fair cheeks, and her eyes overflowed with tears.
"Harry," she said, her voice sweet with unspoken tenderness, "I'm superstitious, you know. I want you to take this with you, an unclipping a slender gold chain from her neck. 'I always had a fancy that this little trinket possessed some hidden charm. Put it on your neck, please, and if you ever are left to the mercy of the wild waves, it will save you, may be, as it did me.'"

At moonrise everything was ready, and with his knapsack strapped across his shoulders, Harry stood in the doorway.

"Good-by, father!" his voice husky.
"Good-by, Harry. Make a man of yourself before you take anchor again!"
"Ay, ay, father!"

Then he broke down, and pulling his cap over his eyes strode away without another word.

One after another the seasons followed each other. The gray mists on the old farmhouse roof grew larger and thicker, the old captain was getting rheumatic and was away the afternoon of the chimney corner, and Aunt Sarah was losing something of her old bustling activity.

Beautiful Syria! The promise of her girlhood was being developed into glorious maturity. But she might have been a pearl, as they called her, in her icy seclusiveness, for all the human feeling she seemed to possess.

Every day the Black Dragon looked for, and every evening brought a disappointment.

At last, one golden afternoon, when sunset streamed in yellow bars over the Headlands, and Syria had looked back the curtains with clusters of scarlet berries and sprays of wintergreen, and ranged the golden pippins in long rows on the table, in the very midst of the expectation the tidings came, brought from the city by a fisherman. The Black Dragon, homeward bound, took fire just under the line, and every soul on board perished. Harry would never come home!

A silence more solemn than death fell on the old farm house. Aunt Sarah sunk beneath the blow into feeble second childhood, and the old captain grew morose and sullen. Syria alone bore the great sea. Fair and white as a pearl, she moved about with sealed lips and solemn eyes, taking all the heavy household cares upon her slender shoulders and working from dawn till twilight.

When the hush of night brooded over the great sea, she took her sole recreation. Gliding down to the beach, she would clamber to the top of the rough boulder and sit for an hour looking out to sea, with her poor eyes full of piteous expectation.

"No," she said, "I won't forget; he'll come by and by, and my little charm will bring him—I will wait."

At last there came an afternoon black with portentous omens.

"I never see such signs as these at the Headlands only once afore, and then we had a gale that just shivered things—when you were going to have it again."

The old fisherman was correct; about sunset it came, with a thundering crack and crash, as if the very heavens were being rolled together.

"The guns have ceased," he said, putting on his oilcloth coat. "The poor ship is gone. I am going down to the shore to see what the boys are doing."

"A bad night, cap'n," one of them said, as he and Syria approached.

"Poor luck, captain—poor luck! We tried putting out the boats, but it was no good; the gale was too hard. We picked up only that chap, and he's done for."

Syria's eyes followed his pointing finger, and beheld stretched upon the wet sand the figure of a man.

"No, no, dead, father!" she cried.
"There's warmth here—indeed there is! Let's take him up to the house and try to save him."

"Do as she bids you," said the old man, and the men obeyed.

"Is he your son, Harry?" Don't you see? Will you waste your precious time? Let us work and save him!" she said.

And they did. By and by a faint warmth diffused itself over his body; a dim red shone in his pale cheeks, and he murmured, just above his breath:

"Syria! Syria! I am coming!"
Syria heard him, and without a word or a sigh dropped in a dead faint at his very feet.

In a few days she entirely recovered and related his adventures. He had made his fortune and was coming home to stay, and no one was more happy than Syria.

Three weeks after that was a grand wedding at the old farmhouse. Capt. Harry Melville received for his bride Syria, the foundling, the beautiful "belle of the ocean," and their cup was full—Waverley Magazine.

Conrad Vallée.

A musketeer which was 57 inches long,
24 inches girth, and weighed 47½ pounds was
caught at Hay Bay on Saturday.

Senator Hardisty, who received injuries
while attending a reception to the Governor-
General, died at Winnipeg last Tuesday.

George Preston, formerly of Belleville,
has been appointed inspector of grain by
the grain and commission merchants of
Oswego.

The good man does is buried with him;
but it is unpleasantly suggested that no
allowance is made for this fact in measuring
the grave.

Court Deseronto, L. O. F., held a special
meeting next Wednesday evening. Matters
of special interest are to come before the
meeting.

A conveyer is being arranged at the south
side of the machine shops for the purpose of
carrying heavy wheels, axles, etc., from the
outside to the interior of the shops.

The women folk are once more happy, fall
house cleaning having commenced and a
large number of windings being cast at
hand. Their cup of bliss is nearly full.

Nine houses out of ten in this town are
unprovided with indoor toilets. The com-
munity should insist that the by-law in
reference to this matter should be carried
out to the letter.

Our thanks are due to many of our patrons
who called at our office this week. The
office during the past week. The prospects
now are that not one delinquent bill will be
on our books by the end of this month.

A large pool of water formed last week in
the excavation being made for the new
McCollough block. One of the workmen
named Bowen fell in and was nearly drowned
before he was rescued by his comrades.

The Napanee people have decided to bore
down a few thousand feet in order to dis-
cover whether oil, coal, or gas underlies
that town. Sir Richard Cartwright, Mr. E.
W. Rathbun and others are interested in
this new enterprise.

Mr. John Dalton furnished the handsome
chair, table, etc., for the new high school
at C. M. B. A. The official chairs are elegant
specimens of workmanship very creditable to
Dalton's furniture establishment at which they
were manufactured.

Councillor Cronk, who carefully takes
note of the depth of water in the Bay of
Quinte, states that last year the water in
the Bay was lower than it had been for
twenty years previous. That is, it was seven
inches lower than this year.

At Terra Haute, Indiana, on Friday last,
after the three year old stallion Astell had
trotted a mile in 2 m. 12s., Colonel Conley,
of Chicago, purchased the horse for \$10,000.
This is the highest price ever paid in the
world for a horse of any description.

All the cheese factories in the Napanee
region have contracted their cheese for the
balance of the season. The greater bulk of
it goes for 10c. to 10½c., but those who
held out did much better. The best sale is
that of the Moscow factory who got 11½c.

The government of Manitoba have
evidently decided in favour of the abolition
of separate schools and the official use of French
as far as that province is concerned. The
government is evidently supported in this
action by the people of the prairie provinces.

The young people now want THE TRIBUNE
to bring its powerful influence to bear upon
Barnes so that he will be induced to build
a land skating rink on a section of the new
driveway. It would be an easy task to
do this and Barnhart should have it in
operation by the end of November.

The Great Northern Telegraph and Tele-
phone Company have opened an office at
Larkins on the extension of the N. T. & Q.
to the Terminal. I. E. Thompson, of New-
burgh, is the operator in charge. Sup-
erintendent expects to have the wire trans-
mission and office as open as far as Tuesday in
a few weeks time.

It would have made a horse laugh to watch
the antics of Paul and his gang of excavators
at St. George street one day last week.
They were all under the influence of fire-
water, and had reached a stage of drunken
affectionateness which caused much amuse-
ment to a crowd of onlookers.

The smallest circus saw in practical use
is a tiny device for cutting the skin of a
gold piece. These saws are about as thick
as ordinary paper and revolve some 4,000
times per minute. Their high velocity keeps
them rigid, notwithstanding their extreme
thinness.

A remarkable case of poisoning comes
from the fourth ward of Sidney. An
outworn among the farming community is
a number of the neighbors had assembled at
the home of the late John for the purpose
of helping him with the year's farming.
After the work was done several of the
others were taken violently ill and be-
coming no better were forced to take to their
beds. When a doctor was finally summoned
he pronounced it a bad case of poisoning as
a result of taking out of poisonous weeds
which grow in abundance in that section.
With medical treatment they rallied and are
now out of danger.—Oswego.

The Board of Health have backed down
and provided a dumping ground.

Popular excursions to the Pacific Coast by
C. P. R. Very low rates. For full infor-
mation call at THE TRIBUNE office.

The Gladiators succeeded in carrying
out the constitution of the British Empire
this evening another seat from the Govern-
ment. Encouraged by their series of brilliant
successes, they have now decided to contest
Brighton, a stronghold of the Unionists,
where they have to face a majority of over
three thousand.

Mr. G. E. Clement has broken ground for a
new house which he will erect on his lot on
the west side of Mill street. He is also
building the extension of the Mill street
front of his own residence. He has also
recently improved the appearance of his St.
George street property by the removal of
that unsightly farm place which was such an
eye sore to the town.

Town Council met last night. Minutes
read and approved. Considerable
business transacted. The following were
present: Mayor, Aldermen, and Councillors.
The following were absent: Aldermen
and Councillors.

Additional market accommodation is re-
quired. Edmund street cannot contain all
the vehicles which now come in on Tuesdays
and other market days. The street cannot
be much longer given up wholly to market
purposes. Now, before land reaches fabu-
lous prices, it is the time for the Council to
purchase a block north of that street for
market purposes. Good buildings would
if we are to hold our own as the best market
town of the district a market must be
secured.

Better Market Accommodation.
Additional market accommodation is re-
quired. Edmund street cannot contain all
the vehicles which now come in on Tuesdays
and other market days. The street cannot
be much longer given up wholly to market
purposes. Now, before land reaches fabu-
lous prices, it is the time for the Council to
purchase a block north of that street for
market purposes. Good buildings would
if we are to hold our own as the best market
town of the district a market must be
secured.

Deseronto Races.
The fall races take place in the Deseronto
Driving Park this afternoon, commencing at
one o'clock. There will be three events:
For all, purse \$30, 100 yd. station race,
and running race, \$30. Entries may be made
with Mr. George Stewart, Deseronto House,
up to 12 o'clock, noon; entrance fee, 25c.
of the purse. The track is in excellent
condition, could not be better. A number of
the best horses in the district will be present
and some exciting races may be expected.
Admission to the grounds, 25c.

Weights and Measures.
Messrs. Johnson and Slattery, inspectors
of weights and measures, were in town this
week and on Tuesday visited the market
where they confiscated several illegal
weights and measures, many of them of a
very antiquated pattern. People should be
careful in this matter and should before
buying discover whether the measures bear
the official stamp. In connection with these
measures it is said that few people will sell
potatoes and apples by the bag give the
weight required by law. This should be
investigated by the proper authorities.

Royal Templars of Temperance.
Representative from Shannville, Deser-
onto, Stirling and Belleville met at Bel-
leville last Friday to form a district council
in connection with the Royal Templars of
Temperance. The meeting was largely at-
tended and an enthusiastic one. The follow-
ing officers were elected: Dr. Nash, D. C.
Belleville; F. J. Fraser, P. C. Deseronto;
P. L. Scott, M. C. Stirling; Rev. J.
Lewis, chap., Shannville; C. H. Ryan, sec.,
Shannville; J. Carr, treas.,
Shannville; F. Cobb, Herald, Belleville;
G. Brown, sentinel, Deseronto. The
meeting then adjourned to meet again at Shannville
in December.

St. Mark's Church Notes.
Last Sunday, the 28th of the month, was a
"Christening Sunday." Three infants were
then received into the "Church Militant." As
far as possible the 2nd and 4th Sundays of
each month may be set apart for the admin-
istration of Holy Baptism. Last Sunday's
morning service was on the subject of "Christ-
ian Unity" as taught in the Epistle for the
day. An evening lecture by the Rev. J. H.
Christian name given in Holy Baptism. On
Wednesday evening the subject of "Church
Revenue" was considered at a well attended
meeting of the male members of the congre-
gation. At the request of the Wardens a
Committee of Finance was appointed to assist
the clergy in the necessary re-arrangement of
work. From the good feeling and generous
disposition manifested at the meeting may
be safely predicted a general response to any
recommendation that may emanate from
the Wardens and Finance Committee. On
Sunday next there will be the Celebration of
the Holy Communion, at 8 a. m.; matins at
11 o'clock; at 7 p. m., Sunday school at
2:30 p. m. Adult Bible class in the church
at 2:45 p. m. as usual.

PERSONAL.
Rev. R. J. Craig spent last Friday in
Kingston.

Mr. Benjamin Brewer is moving from
Chelvey to Oswego.

Mr. James McHenry, of Kingsford, gave
us a call last Friday afternoon.

Judge Fridrik is hunting deer in the
northern townships of Hastings.

Mr. S. R. Burdett, M. P., will start next
week on a trip for health and pleasure.

Mrs. Mary, of Auburn, N. Y., is visiting
in Deseronto as the guest of Mr. E. W.
Rathbun.

Mrs. E. C. French and Miss Rathbun left
on yesterday afternoon for a week's visit
in Toronto.

Mrs. Brown, of Colborne, is visiting
Deseronto as the guest of Mrs. R. Geddis,
Belleville.

Mr. Wm. Gardner, of West Winchester,
has been spending a week in town purchasing
apples, etc.

The Misses Gardner, of West Winchester,
have been visiting in town as the guests of
Mrs. R. Geddis.

Mr. & Mrs. Chas. Henselridge are enjoying
a week's visit to friends in Kingston.

Mr. Harry McBride, purser of the steamer
Gibbs, Toronto, spent Tuesday in town
renewing old associations.

Mr. John Symons, of the Big Store,
spent Sunday in Colborne, on business of
very pressing importance.

Mrs. D. H. Brewer and Miss Young have
returned home to Oswego after a pleasant
visit among friends in Deseronto.

Messrs. Jas. A. Davis and James Macle
left yesterday for a trip of expedition among
the Adirondack Mountains, New York.

Mrs. James Scamthorn and Miss Scott were
in Belleville last Friday attending the
meeting of the district council of Royal Templars.

Mr. and Mrs. George Dugan, of Denver,
Colorado, who have been visiting in North-
port and this district left for their home on
Tuesday.

Mr. P. J. Fullerton, who has been visit-
ing at Deseronto, Board Farm, Co. Leit., left
for his home in San Francisco, Sunday after-
noon, after a visit to Ontario of three months.

A terrible disaster took place on the
Montreal and Ottawa railway at Chelvey
Tuesday. Several persons were killed.

Premier Crisp, of Italy, in a speech at
Palermo, used vigorous language against
the idea of the Pope's temporal power.

1889 :- AUTUMN :- 1889

NO LITTLE SURPRISE was expressed by those who saw THE BIG STORE team coming from the depot with load after load of large iron bound cases, and bales of goods, which had just arrived from Europe. We are glad to inform those who have been patiently and anxiously waiting to see these goods, coming as they do direct from the Mills and Looms of England, Ireland and Scotland, France and Germany that they are now opened, marked, and placed on our shelves and tables.

WE NEED HARDLY POINT OUT to an intelligent Public the advantages to ourselves and patrons obtained by purchasing direct from the manufacturers and producers, as it must be apparent to everyone that by so doing the commissions of wholesale houses and of all middlemen are saved. We have carefully compared the cost of many lines of our imported goods with the prices charged by wholesale dealers with the result that we find that at least 10 per cent. is saved by importing, and the goods are sure to be of the most recent manufacture, and consequently of the latest styles and designs. Moreover, in many instances, goods purchased from middlemen have lain in their warehouses for a long time which detracts from their value and wearing qualities, and as styles change every year goods carried in this way are behind the times, though often represented by those interested in selling them as being of the latest dates.

THE ONLY WAY to ensure getting New, Fresh Goods is by purchasing from the Manufacturers. Our experience in past years has been entirely satisfactory and has encouraged us this year to import not only larger quantities but to add many new lines, and we now place at the disposal of the Public a large and varied assortment of Dry Goods, &c., which for judicious selection, extent, variety, and general excellence, will compare favorably with the stock carried by any of the houses in Toronto and other large cities, and is certainly unequalled by any similar establishments in central Canada.

THE LIMIT of our space of course precludes an enumeration of the goods, sufficient it will be for us to say that the assortment includes Dress Goods of every popular make, Mantles and Mantle Cloths, Silks, Velvets, Flashes, Laces, Hosiery, House Furnishings, Cloths, Tweeds and Meltons. A Specialty is made of Tailoring to order.

WITH REGARD TO PRICES, The 10 per cent. which we save by Patrons, or in other words we save them 10 cents on every dollar's worth of goods they buy from us. Do not be deceived by small dealers who tell you and advertise that they import direct as the records at the Customs Office prove that we are the ONLY direct importers of Dry Goods in this vicinity.

EVERY DEPARTMENT will be found replete with new and seasonable Goods.

WE HOPE to have the pleasure of showing you our Stock at an early date, confidently believing that the merits of the goods and the Low Prices charged for them will meet with your approval and induce you to buy.

THE BIG STORE.

Main Street, Deseronto.

September 20th, 1889

Frank Chalmers has fitted up a fine new store on the old Tavern stand, in the town of J. J. Vinton is also fitting up the post office and store in the same ancient bough.
The body of a woman was found interred in sand on the south side of the Murray canal. It is supposed to be a murder case though others think the work of medical students.
A farmer has been awarded \$400 damages and has gained a perpetual injunction against W. B. McAllister, owner of a roller mill at Pembroke, whose dam had backed up water and flooded farming lands.
John Thomas Blondin, aged 21 years, a teacher of Madoc township, has been committed to jail on a charge of seducing Lillie May Robins one of the daughters of 13 year Blondin, who stoutly maintains his innocence formerly belonged to Shannonville and bore an irreproachable character.

BURYING OF THE DEAD.

CHANGES IN FUNERAL CUSTOMS
DICTATED BY GOOD SENSE.

Women No Longer Expected to Attend

Funeral Services, Nor Men to Stand with

Dead Bodies by the Grave—No Long

Procession of Carriages.

The undertakers of this city announce

that funeral customs no longer what they

used to be. Women are no longer ex-

pected to attend them, and with some

exceptions they don't. The statement of

the fact was made known through the

publication in a Philadelphia newspaper

of a number of interviews with under-

takers in that city. In a recently pub-

lished notice of a woman in Phila-

delphia this sentence was embodied:

"Male members of the family only are

invited to attend." This notice was pub-

lished in accordance with the wishes of

the dead woman. Since then there has

been a great deal of talk about the

practical and sensible trend of mind. Her

style was to prevent the attendance at

her funeral of women who might, if it

were bad weather, contract disease of a

serious nature.

IN PHILADELPHIA.

Until very recently numerous at-

tended funerals had been very common

in Philadelphia. Scores of carriages fol-

lowed the deceased lady or woman to the

grave, and a great many women stood around

on the damp ground in all kinds of

weather while the coffin was lowered

into its last resting place. Philadelphia

is gradually awakening to the fact that

this sort of thing is dangerous. Strange

to say, it appears to be due to the under-

takers of that city that these changes are

being made. Evidently they are not so

calculating and selfish as various writers

of fiction have portrayed them. The

more carriages there are at a funeral the

bigger the undertaker's bill is, yet the

Philadelphia members of the profession

seem to view this fact with indifference.

Said Mr. P. E. Bridgman, one of the

most prominent of these gentlemen:

"The custom in vogue here of a large

concourse of friends and relatives at-

tending funerals is a very foolish one.

Most members of the family only should

attend, according to the custom of the

burial ground, and I am glad to see that

this plan is being adopted by several

families of this city. Ladies should not

be taken to the burial ground, for more

than one reason, viz. they are not fit to

be there. It subjects them to a great

nervous strain to see the body of some

member of their family or some relative

lowered into the ground, and time and

disagreeable scenes are witnessed from

the excitement.

"Sometimes there is a hitch in the

dropping of the coffin, so that considera-

ble difficulty is occasioned in getting it

straightened out. Accidents of this na-

ture are very frequent of recent pros-

tration, and women should not be sub-

jected to them.

"It is a striking fact that half of our

funerals take place on stormy days, when

it is positively dangerous for any man

not to mention ladies, to stand for a

long time on the wet ground until the

interment is finished. This city is, how-

ever, getting to be somewhat enlighten-

ed on the subject of funerals. A few

years ago the hearse was a four or five

carriage to every funeral, but now this

number is reduced to about eight. Of

course, the more people attend funerals

the better it is for the undertaker. His

business is to bury the dead, and he can

do this for the burial of those who are

sick and die because of the exposure at

the burial ground. But we undertakers

have sympathetic souls like other classes

of humanity, and I for one advise my

patrons to have the funeral ceremony at

home, and then let only a few gen-

tlemen of the family accompany the

body to the cemetery."

Undertaker J. R. Knowles expressed

the same sentiment in another address:

"The exclusion of ladies and friends

at funerals is an admirable policy to

adopt. This city is just awakening to

the fact that a big funeral is a big

expense, and that every large funeral is

the cause of the death of at least one person

who attends it."

New York adopted the new custom

some time since. Save in the case of

men of great official prominence, few

funerals, with the exception of those of

foreigners and persons of the poorer

class, who accept innovations in such

matters slowly, are largely attended,

even by men. Nowadays there are rare-

ly more than three or four carriages at

the funeral of a person of good social

rank, and five seems to be the maxi-

mum. The more fashionable the fam-

ily the simpler the arrangements are.

At a large proportion of such funerals

that have taken place lately there have

DISTRICT ITEMS.

The Stirling fair was a decided success. Drunkenness is quite prevalent in York. Next Sunday is hospital Sunday in Kingston.

Corn husking is going on in all parts of the district.

Frontenac masonic lodge, Cataract, will be closed.

The Methodist of York realized \$20 by a social.

Alf. Brown is collector of taxes in Southampton.

Brighton's rate of taxation is 11 1/2 mills on the dollar.

The new English church at Bancroft is now finished.

William Winter, haggamaster at Prescott, died last week.

Gambling was carried on to a great extent at the Perth fair.

Dull times in Prince Edward owing to the low price of grain.

Knox church, Perth, has been renovated at a cost of \$8,000.

Garden Island is suffering from diphtheria and other diseases.

A council of Chosen Friends has been instituted at Parham.

John McMillen, formerly of Canifiton, is acting mayor of Port Hope.

Rev. Canon White, of Iroquois, has been appointed Rector of Trenton.

H. Ronney, Seymour, has grown a squash which weighed 16 lbs.

Potatoes are a good crop in North Hastings except on very low grounds.

Joseph Tysick, Sharbot Lake, has a squash weighing 14 pounds.

The town hall, Adolphstown, is greatly in need of paint and repairs.

Belleville carpenters will on and after May 1st claim the nine hours system.

The canning factories in Prince Edward are now busy putting up pumpkins.

Tenders are asked for a wooden log farm building to be erected at Point Pelee.

The North Renfrew fair has been postponed on account of a heavy snow storm.

There is a large number of applicants for the position of chief of police in Nanapan.

Potatoes are being shipped in large quantities from Trenton to the United States.

Rolling mills will be established at Belleville. American capitalists are interested.

The prize receipts of the Nanapan fair reached \$800, a little better than last year.

Burglars carried off \$50 worth of boots and shoes from George Jackson's shop in Hastings.

Archbishop Cleary laid the corner stone of the new R. C. Church in Ganaroco on Sunday.

Mrs. Elizabeth Wyott, of Odessa, was fined \$50 and costs for selling liquor without a license.

The Ogdensburg agricultural show dropped \$3,300 by its show held during a disagreeable week.

Frederick Brown, a baker of Hamilton, but formerly of Belleville, died last Saturday aged 48 years.

Adam, aged 21, son of Andrew Boomhower, of Arden, died recently in Otago, Mich., of typhoid fever.

One Teel, of Cloyne, was sentenced to three months imprisonment for selling liquor without a license.

Mr. Miller, of Arden, got 6,000 lbs of herring from his agency this year. One live yielded 149 pounds.

The Methodists at Athens expose in the church the dead bodies of infants to the gaze of the congregation.

Mrs. Penwick, of Williamsburg, was robbed of \$85 which she kept under a carpet, which was taken down.

Rev. Mr. Millard, of Lansdowne, was appointed to the charge of Algoma Mills by the home mission society.

John E. Smith and John Bennett are charged with the alleged burning of the Woodbine hotel, Trenton.

Frank Roblin, a former member of the Nanapan Band, was drowned in British Columbia two weeks since.

Trenton complains that the streets are without light just at the time the burglar chooses to put in his work.

Young men and boys who disturbed the Salvation Army meeting in Cornwall were fined five dollars and costs each.

Judge Jellett, of Prince Edward, will be superannuated, and it is thought his successor will be Mr. E. Merritt of Victoria.

M. Dricoll, town solicitor for Pembroke, has been dismissed for obtaining a letter belonging to the town council and destroying it.

Smith's Falls will join the ranks of other towns which are in vain attempting to keep out confined exiles by housing facilities.

The population of Brockville is 8,887, an increase of 81 over last year. Brockville is all the other eastern towns at a stand still.

Elizabeth Birby, aged 12 years, belonging to the Bernardo Orphan's Home in Peterboro slipped from a log and was drowned in the Otonabee river.

James Freer, has issued writs against the village of Campbellford for \$10,000 to cover damages sustained on account of obstructions left on the street.

Sylvanus Mullett, of Madoc township, died on the 3rd inst., aged 74 years. W. W. Collins, of the same township, died on the 5th inst., aged 73 years.

Wm. McKenney, of the 9th constituency of Thurlow, appeared before the police magistrate at Belleville on the charge of firing a revolver at Lewis Marsh.

The Rathbun Company are building a station and putting in apparatus, including powerful pump and 1500 feet of hose, to protect their property in Ganaroco.

John S. Youmans, a young man employed in the News office, Bowmansville, was found dead in his room. It is supposed that inflammatory rheumatism was the cause.

Peter Wood, who was employed drawing milk for the Greenhush cheese factory, was thrown from his wagon and received injuries from which he died on the 6th inst.

The congregation of Bryn Atrid church, Belleville, are much annoyed by boys running out of church during the service. So reside in Deseronto.

A prisoner confined in the Athens lock-up was nearly asphyxiated with smoke, owing to a stoppage in the flue. By breaking the window and crying "fire" he attracted attention and obtained relief.

A little boy of some two years of age, youngest son of Aaron McDonald, farmer of Bloomfield, got hold of a pill containing the toothache remedy and swallowed a portion of the mixture. In less than an hour he was dead.

NEWS OF THE DAY.

The Car arrived at Berlin.

Hard coal is selling at \$9.50 per ton in Windsor.

There are several cases of yellow fever at Key West.

A local insurance company was formed at London, Ont.

Severe floods are reported in the Tyrol, also in Carinthia.

Judge Oliver died suddenly at Ottawa on Thursday evening.

The general store at the Bagger mine has been destroyed by fire.

It has been decided to close the Paris Exposition on November 6.

Track laying has commenced last week on the Great North West Central.

Hon. E. R. Oakes, a member of the Nova Scotia Legislative Council, is dead.

St. Benignus, Suffolke, ex-Lord Mayor of London, is dead, aged 73.

Hon. Gains Turner has resigned from the Blair Government in New Brunswick.

Rev. Owen Jones, of the Welsh Calvinistic Methodist ministry, is dead, aged 64.

Large quantities of potatoes are being shipped from Nova Scotia to Havana.

During September the net debt on the Dominion has been reduced by \$2,403,284.

The farmers of Stevens county, Kansas, have suffered four successive crop failures.

A resident of Guelph has fallen heir to an estate yielding an income of \$150,000 a year.

The Brooklyn tabernacle, of which Rev. De Devote is pastor, was burned Sunday morning.

It is proposed to start an umbrella factory in Toronto in which 200 hands will be employed.

During the past two years ten men have been killed and seventeen injured by electric wires in New York.

Five residents of Iverhuron have been drowned by the capsizing of two fishing boats on Lake Huron.

The Grand Encampment of Knights Templar will hold their next convocation three years hence at Denver, Col.

Further details of the failure of the firm of Penner, Peck & Plesch show that their liabilities will be at least \$75,000.

Roy & Co., the great Belgian iron and engineering establishment, of St. Hyacinthe, Que., employing 400 men.

Vincent Cranbrook, Lord President of the Privy Council of England, is about to retire from the Cabinet, owing to ill health.

The widow of a soldier of Pennsylvania will return to work, the difference regarding wages having been settled with the employers.

Two companies of Mexican troops have been slaughtered by Yaki Indians. Not a man was left to tell the story of the terrible butchery.

The St. State of Nebraska and the Allan Line have agreed to a collision at Greenock on Saturday. Both vessels were badly damaged.

Plans are being prepared for an immense suspension bridge to span the Hudson from Jersey City to New York. The estimated cost is \$400,000.

Advices from Mexico say a Chicago firm are building a great sugar refinery at Linares, in the state of Tlaxcala, the first ever erected in the republic.

The Finance Department Friday issued the final statement of revenue and expenditure for the last fiscal year, shows a splendid surplus of \$1,007,000.

At Amherst, N. S., on Saturday, James Smith, convicted of killing George Barron, a fellow-laborer on the Chignecto ship railway, was sentenced to the Dorchester penitentiary for 20 years.

Constable Halsten, of Kewatin, fired a shot instantly killing Joe Perran, on Friday, and the coroner's jury returned this verdict: "That Joe Perran came to his death by a pistol shot."

At Montreal Friday 2000 Victoria medical students refused to attend lectures by Laval professors. The dispute over the amalgamation of the two schools appears to have assumed a somewhat serious aspect.

Samuel Hitch, a middle-aged Englishman, convicted of indecently assaulting a five-year-old child, received 20 lashes in the gaol, N. S., jail Saturday. The "cat" used was borrowed from a man-of-war at Halifax.

At Birmingham, Friday, the National Conference of Miners declared in favor of a working day of nine hours. The rule was put into operation on January 1. If the demand is not granted the miners have decided to strike.

Members of the Iowa tribe of Indians are very well off. They have been reduced in number to eighty three persons, and have 200,000 acres of rich farming land, which they are to sell the government—an average of over 2,400 acres each.

The corner's jury brought in their verdict at Hamilton in the Dundas shooting case. It was homicide by misadventure, slightly blaming the police for not being ready to go his flailing fault with the relatives of the dead man for not paying more attention to his unusual mental condition. The jury recommended that he be released on bail, and from arrest and reinstated on the police force.

CANNIBALISTIC INDIANS.

A gentleman just returned from an exploring expedition in the wilds of north-western Ontario said that he had discovered that to go his travels a tribe of Indians who had practiced cannibalism up to within a few years ago when the country was visited by French missionaries. In the vicinity of Abitibi lake he was shown an Indian child whose grandfather had killed and eaten seven of his young children, the child's father being the victim of the cannibalism.

On entering the wigwam they found the head of the last child boiling in a pot over the fire. She was ordered to eat it. The child was then drawn out to see who the execution should be. The unlucky straw fell to an old Indian, who, from doing further harm, was killed by the child, several years ago, he found that a full blooded warrior had killed and eaten four of his sons, but was afterwards shot and killed by his fifth son.

AN EDITOR'S LAMENT.

A contemporary waits on his sorrows in verse as follows: The autumn leaves are falling and the year is growing old, and the snow drifts further down. Yet our wounded still is empty, and our cup full of air, and our winter clothing is made of straw. Yet the marble faced delinquent reads our paper by the stove, while he burns away the coal for us, and the miserly miser who shivers in his coat, and the spendid library, all of which will be sold in the course of the next few months.

THE ORIGIN OF THE MAINE LAW.

General Neal Dow, of Maine, when eighty-four years of age, was almost as youthful and as fresh as at forty. Sitting in his study at Portland, he told how it happened that he first undertook the big task of abolishing the liquor traffic.

"I have never told the story in public," he said, "nor has it ever been printed. As you know," he went on, "it was a good many years ago. I was sitting in this same house one evening quite late. In answering a knock at the door I found a lady, whom I knew very well as the wife of a government official in this city. She was a perfect drunkard, and on this very night was down town on a spree. His wife wished me to get him home quickly, because if he was drunk next day he might lose his position."

"I started out, and found him in the back room of one of the down town saloons. He was in the days of license in Maine. I said to the keeper in a quiet way—'I wish you would sell no more liquor to Mr. Blank.'"

"Why, Mr. Dow," he said, "this is my business; I must supply my customers."

"That man," he said, "right here is this gentleman with a large family depending on him for support. If he goes to his office tomorrow, he will lose his place. I wish you would sell him no more."

"He became somewhat angry; told me that he had a family to support; that he had a license to sell liquor to whomsoever he pleased—and that he didn't care to have me meddling in his business. 'So, then, you are a drunkard's friend,' he said. 'I wish you would support your family by destroying that man's. We'll see about this.'"

"I went home thoroughly determined to devote my life to suppressing the liquor traffic in the best way possible. The Maine Law originated in that rum shop."

AN HISTORICAL FIND.

A despatch from Ticonderoga to the Troy Morning Telegram says: While laborers were engaged in digging a sewer in one of the principal streets of this village Thursday they struck a tombstone. At the bottom of it was found a coffin, containing the bones of a human being. The stone was washed off and found to contain the inscription and date of the death of Lord Howe. The skull was intact but the rest of the bones were disjunct and considerably decayed. As soon as it is believed that the bones belong to an immense crowd of people assembled, and many made desperate efforts to procure pieces of the bones. The coffin, which was of oak, was in a fairly good state of preservation, and it was with great difficulty that people were prevented from cutting it to pieces for relics. Several years ago the street where the remains were found was filled in several feet, which accounts for the depth of the coffin's location. The remains will probably be re-interred at once in the village cemetery.

Lord Howe, or George Augustus Howe, was born in England, in 1724, and was shot in battle at Fort Mifflin, on July 18, 1776. He entered the army at a very early age, soon rose to distinction and in 1757 was sent to this country in command of the Sixtieth regiment, arriving at Halifax, N. S., in July of that year. He was transferred to the command of the Fifty-fifth infantry and was promoted to be brigadier general. On July 1783, the Commander in Chief, General Abercrombie, he landed at the outlet of Lake George. Coming suddenly upon the French forces two days later at Fort Ticonderoga he surprised them and won the ensuing skirmish. The General Court of Massachusetts appropriated \$250 for his monument, which was erected in Westminster Abbey.

DISEASE IN FARM ANIMALS.

We should endeavor to prevent the appearance of disease, rather than to cure it after it has come. Sanitation, not medication, is what will reduce disease among farm animals to the minimum. Disease is far more common among swine than among other farm animals in this country. Annually above ten per cent of our live stock die of disease. Yet the men who have raised swine extensively for fifteen to twenty years with as little disease among them as among the best kept horses or cattle. These men have reared pure bred swine, and some of them are in the region where swine are largely fed. It cannot, therefore, be said that no disease should be kept out of breeding, or wholly to the large feeding of them. There is no reason why swine should be more subject to disease than other farm animals. The fact is, they are, because they are treated differently. Their quarters are allowed to become more filthy; they are given drink that other animals would not be expected to use; their feed is thrown in the mud and their own manure; and their shelters are of the poorest description and devoid of all means of ventilation. The men who have raised swine with little disease, have given their swine pure drink, a variety of clean, wholesome food, comfort and well ventilated shelters and clean, dry quarters.

It must not, however, be inferred that there is among other farm animals no more disease than there should be. If swine are taken to provide sheep, cattle and horses with only halfhearted food, drink, shelter and surroundings, it is safe to say that the swine will be more diseased than the other animals. The investigations of European veterinarians, and of Drs. Law, Grant and others, have shown that the best preventive of every disease afflicting our farm animals.

The measures recommended for the prevention of disease would also be desirable were there no disease to be feared. It is firmly established that animals in low bodily condition are more susceptible to disease, and that the more vigorous, thrifty animals, that which makes the farm animal thrifty and vigorous, and therefore less liable to disease, also makes it more susceptible to disease. The food, drink and surroundings of the animal, the stronger its appetite and the more thorough its digestion. If, on the other hand, the food of support is at the maximum, and as this measures the gain, the more the animal is vigorous, the more the amount of food which escapes assimilation is reduced to the minimum. Where "poor condition" is not allowed to exist, disease is scarcely known, and at the same time the animal makes the largest return for the food consumed. While we have need of our hundred veterinarians, and at the same time, have their work, as that of the physician of the human body, will be largely, and more and more, in the future, in the prevention of disease.—*American Agriculturist* for October.

While Collins has left a fortune of up to \$20,000, including the estimated value of his small but very choice collection of pictures and old furniture, and a splendid library, all of which will be sold in the course of the next few months.

MANAGEMENT OF CREAM.

The management of the cream is the most particular of all the special points in butter-making, both as regards the quantity and quality of the butter. Sweet cream makes less butter, and that of a less pleasant flavor than sour cream. But if the souring is managed so that the flavor of the butter is deteriorated, as the acidity hastens the production of those volatile acids which when absorbed into the condition which is known as rancidity. It is to the very moderate quantity of these acids in the butter that the pleasant nutty flavor and peculiar agreeable odor of good butter are due. The proper condition of the cream is called ripeness. The ripening of cream consists in the production of a certain quantity of lactic acid in the milk, of which the larger part—from sixty to seventy-five per cent—of the cream consists. The quantity of acid in the cream should be no more than is sufficient to give it a mild, pleasant-sour taste, and this is produced precisely by the following methods with shallow or deep cooling respectively. With the former the milk is set in shallow pans, in a temperature of sixty to sixty-two degrees, for thirty-six hours, when it is skimmed, the milk being still sweet or very slightly soured. The cream is skimmed at intervals of twelve hours, is kept in a covered jar at the same temperature, and fresh cream is added to the milk skimmer, the whole is gently stirred, to mix altogether. At the expiration of thirty-six hours from the first skimming the cream will be in the best condition for churning, and "ripened" as it is now termed, and for making excellent butter. With the cold water and deep pan method, the milk is skimmed twenty-four hours after the milk has been set, and is kept in a pail set in the tank at the usual temperature of forty-five degrees until there is enough for the churning, or the period of each skimming may be churning each day. But the cream must then be ripened before it is churned. This may be done by exposing the cream to a temperature of sixty to sixty-five degrees for twenty-four hours to produce the requisite acidity or ripeness; but this day may be avoided and the ripening hastened by adding a sufficient quantity of sour milk or buttermilk of the previous day's churning to produce this sourness. Generally only one pint of sour milk to twenty quarts of the sweet cream will be enough for this purpose; the cream being gently stirred so as to mix the sour milk evenly through it. The precision with which this ripening is effected is the main point in making the best quality of butter, and to insure this the thermometer should be used to regulate the temperature, and the time should be noted; for temperature and time act together, and one element being in excess the other needs to be increased to reach the desirable effect. If all the operations of the dairy are performed with precision, the cleanliness of everything used in the dairy, and the milk is perfectly secured, then the temperature and time may be fixed by rule; if the temperature is increased the time is decreased, and vice versa; and thus every time the same results may be reached.—*American Agriculturist* for October.

SELECTION AND CARE OF SEED-CORN.

Select for uniformity. Keep in mind the location, the nature of the soil, climate and number of days required for maturity, and choose a strain suited to the particular situation. In most cases better results are possible from home-grown seed than will be obtained by buying from a distant seed-house. Clayey uplands require shallow-grained varieties, of good length, of good length. Bottom lands will mature deep-grained varieties, with thick cob, and kernels less flinty. Choose a strain which is adapted to the locality, and yields the best and most shapely ears, and endeavor to improve it each year by selecting the best seed.

The work of securing seed-corn should really begin at planting time. Let a small plot of the best ground of the entire farm for the corn crop be planted early and receive a fine exposure to the sun. Let the corn ripen early, and as soon as the kernels are sufficiently hardened, it should be cut and set up in small shocks. This will allow the corn to dry rapidly. But the one plot should be there is any possibility of an autumn freeze. While hauling to the crib, select from the entire lot such ears as approach the ideal corn. Let the ears be as easy to handle when selection is confined to such a small area. It is not safe to depend upon the air and sunshine to dry the corn thoroughly, but better to place the seed-corn where it will secure artificial heat, and dry it until no freezing will damage it. It is now ready to be stored for the winter.—*American Agriculturist* for October.

TREATMENT OF CELERY.

Celery, whether self-blanching or otherwise, can be grown with much little labor, but like other vegetables, the more care that is given, the better will be the result. There is a certain crispness and delicacy of flavor which can only be imparted by banking generously with earth. Previous to banking the celery is necessary.

Last year I bought a few pounds of straw paper, and the sheets into ten inch strips, and wrapped the plants in paper jacket, then hilled up almost to the top of the papers. After a little practice, this can be done as expeditiously as the ordinary tying up. This wrapping should be done when the plants are perhaps a foot high, keeping the loose end of the paper in place with a handful of earth, thrown on with a garden trowel, until the row is finished. Care should always be taken in hilling up to give a broad base to the hill, as the plants are drawn up higher later on, if the plants have grown far enough above the paper to make it necessary. Persons raising celery on a large scale should not only guard against the use of a few hundred for family use are grown, this plan cannot be taken advantage of by this process: 1. There are no crooked stalks, as is often the case when the plants are drawn up higher later on, if the plants have grown far enough above the paper to make it necessary. Persons raising celery on a large scale should not only guard against the use of a few hundred for family use are grown, this plan cannot be taken advantage of by this process: 1. KINGSFORD.

From Our Own Correspondent.
Mr. and Mrs. Denis O'Connor, of South
Frederickburgh, were visiting here last
week.

Mrs. Ralph Abbott has been visiting her
relatives in Napanee.

Mrs. McKillen, of Napanee, has been
visiting here.

Dr. Augustus Whiteman is visiting here.
The Dr. has been practicing with his brother
in Shakespeare, but intends shortly to open
a practice of his own.

Miss Druvery, of Napanee, has been visit-
ing Miss Minnie Gordon.

The barn of Mr. Nelson McBride contain-
ing this season's crop was burned on Friday
afternoon. Mr. McBride had threshed a
few weeks ago and the barn was full of hay,
straw and grain. There was also a stack
outside. The fire was observed about 1
o'clock and in a few minutes the barn and
stacks were destroyed. The cause of the fire
originated is not known. There was an
insurance on the barn.

We regret to announce the death of Mrs.
Francis Brennan, which took place on the
afternoon of the 15th inst. Mrs. Brennan
had been an invalid for a long time. That
infectious disease consumption had developed
in her and for months past she had gradually
been wasting away, her family having been
unable all along although everything was
done that medical skill and loving hands
could do to prolong her life. The deceased
was a universal favorite in the community,
and was loved and esteemed by a large circle
of relatives and friends. She was the fourth
daughter of the late Squire McHenry. She
knew that her days were numbered and was
perfectly contented to the last. Surrounded
by her family and fortified by the rites of
the Catholic Church she peacefully expired
and passed into that sleep that knows no
wakening until the last dread trumpet shall
sound. The funeral took place on Thursday
17th inst., and was largely attended. The
remains were placed temporarily in the vault
in the Catholic Cemetery, Napanee, and in
a few weeks will be buried in the cemetery
at Marysville. Mrs. Brennan leaves three
children, a sorrowing husband and a wid-
owed mother to mourn her loss, who have
the sincere sympathy of the whole com-
munity in their bereavement.

Mr. Thomas F. Saxsmith, son of Mr. John
Saxsmith, was married on Sunday last to
Miss Mary Elizabeth Brennan, eldest
daughter of the late Joseph Brennan. The
ceremony was performed by the Rev. Father
McCarthy at St. Charles' Church, Deseronto.
We extend hearty congratulations together
with their hosts of friends.

Cupid seems to have been very busy lately
and we expect to see many weddings to
announce before long.

Miss Maggie Sion, of Codrington, is
visiting friends in Tyendinaga.

We expect to see an account of the ordina-
tion and induction of the Rev. James
Ratray, B. A., but unavoidable absence
from home prevented us from sending our
usual correspondence last week.

The ordination and induction of the Rev. gentle-
man to the pastoral charge of the congre-
gation of Shannonville, Alton and Lonsdale,
took place at Melrose on Thursday 19th
Oct. at 2 o'clock p.m. Owing to the absence
of the Moderator the Rev. Mr. McLean the
Rev. Mr. Young presided and also addressed
the congregation. The Rev. Mr. Mc-
Kinno, preached the ordination sermon
taking as his text Romans 1. 16, and the
Rev. R. J. Craig addressed the minister.
There was a large attendance from the three

congregations a proof, if one were wanting,
that Mr. Ratray was the unanimous choice
of this people. The Rev. gentleman
takes possession of his charge under most
favorable circumstances. This charge has
been a mission for the last 9 years, but the
Presbytery at their last meeting raised it
into a regular congregation. A stipend of
\$765 per annum is guaranteed and a Manse
at Melrose.

The services in St. Jude's Church (Rev. C.
O. Bayle) are held every Sunday at 2:30
p.m. except the last Sunday of each month
when service is held at 10:30 a.m.

During the fall mass will be celebrated in
St. Patrick's Church (Rev. Father McCarthy)
at 9:30 a.m. each Sunday.

TYENDINAGA RESERVE

From Our Own Correspondent.

After service at the Mission School on Sun-
day evening chief Ansootikah made an
address in which he referred to the kind
manner in which he had been treated by
Christian friends on the other side of the
Atlantic and the interest felt by them in the
Indians of this reserve.

The silver medals awarded to Mrs. Maggie
Claus and Samson Green as past pupils of
the Mohawk Institution, Bradford, who
have by the influence and example been
esteemed worthy of this distinguishing badge
of the New England Company's approval,
will be given immediately after service at
Christ Church on Sunday next.

The wedding feast provided at the
residence of George Maracle on the marriage
of his son Albert, on Wednesday last, was
on the grandest scale. No expense was
spared to make it the event of 1889.

The ferry arbitration drags on slowly.
The "Pines" again overhauled to build
flues, put in furnace and new grates and
make things ready for the approaching
severe winter.

Sam Gledhill is making a good job at Mud
Creek bridge.

Robert Stanhope, of Deseronto, who had
for many years been a resident of the Reserve
was buried by the clerical staff of St. Mark's
on the 22nd inst. by the clerical staff of St. Mark's.

John A. Loft has moved his house a few
yards east of its old position. He is renovat-
ing considerably and evidently intends to
make things about him snug.

David C. Maracle, whose comfortable
brick residence was destroyed by fire early
in September, has nearly completed a new
house.

Dan Doren is about to become a resident
of our town. The farm on the Reserve will
be occupied by his sons.

Simon Hill has left the employ of Dr.
Oronhyatkeha and returned to his own farm
the old John Martin place.

Slash road tenants take the bun this year
for the amount of grain raised.

BETHEL.

From Our Own Correspondent.

Mr. and Mrs. Beck, of New York, are
visiting friends in this vicinity and appear
highly delighted with the country as well
as the folks.

Min Calman is spending a few days with
her sister, Mrs. S. Gorman.

Mr. A. M. Clarke, of South Bay, paid a
visit to this locality and took in the Demo-
cratic show which he pronounced a fine
exhibition. The weather was of the best,
the roads good, a large crowd of people, a

good display of stock and vegetables, and as
for ladies' fancy and fine work, it was
magnificent.

The Ladies' Aid Society of the Presbyter-
ian Church held one of their very popular
socials at the residence of Mr. John Craw-
ford on Tuesday night. The weather was
fine, the attendance good, estates of the
best, with abundance of hot tea and coffee.

When these ladies undertake anything they
do it in a regular way, and a good programme
carried out to the letter; a good programme
was carried out and altogether a grand
success. Ladies, we hope soon to have the
pleasure of another of the same kind.

SHANNONVILLE.

From Our Own Correspondent.

Mr. W. Burdett, of California, brother of
S. B. Burdett, M. P., was in the village
renewing old acquaintances on Sunday last.

Mr. & Mrs. M. B. Lake spent Sunday in
Deseronto as the guest of Mr. M. Lake.

Mrs. C. Clark and Miss Nettie Clark, were
visiting friends in Deseronto on Monday of
this week.

Presbytery church of this village on
Sunday Nov. 3rd, at 3 p.m.

Rev. Mr. Golden will deliver a lecture in
Trinity Church on the evening of Nov. 5th.
A barn owned by Mr. Chas. Larey, was
consumed by fire on Saturday last together
with its contents. No insurance.

LONSDALE.

From Our Own Correspondent.

One of our young citizens having nearly
completed his fine house has been absent
some days and reports says he is in the Bay
City and has taken a Belleville lady as a
partner for life to enjoy his new home.

Mr. M. Casey moved to Belleville last
week and Mr. Hamilton, our new merchant,
has moved into Mr. Casey's house and is now
settled down to business. A new tin roof
having been put on his store and his stock of
goods nicely arranged he is waiting on his
customers and filling all orders with
despatch.

Mr. Jas. Reid, of Picton, is in our village
with his steam drilling machine working
through our solid rock and supplying us
with pure cold water which was much needed
as we had but two wells in the place to
supply the inhabitants; one of these is
fed from the river and fails when the river
is low. Mr. Reid is well known in Prince
Edward County and tells me he has followed
his business for eight years and has drilled
over 300 wells. He has just finished one for
Mr. Miles Sweeney which is 32 feet deep,
with a good supply of water and is now
working at one for Mr. J. Brown. He
furnishes and puts in pumps if desired that
will keep out surface water and all dirt
keeping the well always clean. All parties
wanting a well through the rock cannot do
better than to engage him as water is soon
obtained with small expense.

On Sunday night last a young man stopped
overnight at Archy Campbell, Mary-
sville, and on Monday morning left relieving
him of about \$50. A man answering his
description is captured at Kingston and Mr.
C. was sent for and went down.

A magnificent English tree known as the
"Winfarthing oak," which measured 38 feet
7 inches in girth, and 74 in. in diameter,
has been found in the woods just been
relocated and found to have grown just
seventeen inches in the interval, 130 years.

The barquentine Josephine, from Port of
Spain for New York with a cargo of asphalt,
has been lost at sea.

GOLDEN WEDDING.

Mr. and Mrs. Benjamin J. Allison, of
Tyndinaga, celebrated the 50th anniversary
of their marriage at their residence on the
15th inst. The anniversary was made the
occasion of a happy reunion, a large number
of children and grand children assembling at
the old homestead in honour of the event.

Among others present were: Mr. & Mrs. A.
G. Allison, Belleville; Mr. & Mrs. Frank
Burr, Pawling, N. Y.; Mrs. John Noble,
Meridian Park, St. Paul; Mr. & Mrs. W.
H. Allison, Toronto; and Mr. & Mrs. G.
Allison, Marysville. An exceedingly
pleasant day was spent with the aged couple,
who are still in good health and spirits.

A large number of valuable and useful presents
were given, among other a gold headed cane,
gold brooch, gold thimble, gold chain, etc.
Mr. & Mrs. Allison settled on the farm they
now occupy in March 1840, and were thus
among the old pioneers of this district. They
moved thither from Prince Edward County
making their journey on an ox sled. They
crossed the bay on the ice at Randall's
erry and the whole day was spent in mak-
ing the journey by a circuitous route
through the woods as the roads were
wretched the mud in many places being
knee deep. Thus commencing their life in
the woods they selected a farm without the
first sign of any chopping having been done.

A large tract was sold and used as the
foundation of the log building. Mr. Allison
was obliged to borrow an axe to cut this
tree and afterwards worked day after day
a neighbor in order to raise money enough
to purchase an axe for himself. In fact the
couple had nothing to commence life except
a hand saw and a few nails.

During the first twenty years of great exertions and
labor they cleared nearly 300 acres of land,
and now own the best farm in
Tyndinaga. They were blessed with a
large family of twelve children of whom
nine are still living, and they have also 39
grand children. All will unite in wishing
the aged people happiness and peace during
their declining years.

BARRELLING APPLES.

In packing a barrel of apples, advises the
President of the Ontario Fruit Growers'
Association, choose a solid place in the
ground and place the barrel upon a solid
piece of plank. Lay the first course of apples
with the stem end down, not selecting
special samples for this course, but placing
the apples in their cones, and placing
them so as to make a solid row in the bottom.
The next row should be put in carefully
with the blossom end down. When the
barrel is full, packing in order to know
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch above the
chine, or even farther. Then the last row
should be placed so as to be in an oval pos-
ition before putting the press on, that is
where a little judgement and expe-
rience is required. The men must know

rience is required. The men must know
how many to put in the barrel, whether he
will fill it to the chins, an inch

THEY BORROW, BUT NEVER RETURN.

Oh, the life of this life is many,
And the heart breaking story,
Pure sympathy comes from my,
It matters not what you do,
I can sometimes trust to you,
Nor over its lingering years,
But the books I find to be true,
They never, no, never return.

The harvest may wait for the reaper,
The sailor may sleep over your clothes,
But the earth is ploughed by the reaper,
And no one can care for it now,
The sunshine that goes from the meadows,
Closes back when the sun is down,
And the leaves play again with their shadows,
But the books will never return.

I met him with the wisdom of ages
Shut up in my glass case for use,
Now I know, by invisible signs,
From Murray to old Mother Goose,
My English, I still can remember,
Like the color from some ancient urn
Want out, to come back in December,
That December will not return.

Lead your friend, your dog, your sister,
You will find each same as you, no doubt;
But a book goes down the long vista,
And ten to one never comes out.
I know when I finish the book,
No, but my brain I never get churning,
What matters it where they have gone to,
I know they will never return.

The Sea Horse.

The sea-horse is so called because he
hasn't the least resemblance to a horse,
and because he is never seen in the sea.
The name was given him by some smart
Alec who felt awfully funny that day.
Some years later another smart Alec
changed the name to sea cow, but that
didn't hit any closer. They are found
in rivers and lagoons instead of the sea,
and they resemble cows as much as a
buffed woodcock does a live lion.

The principal occupation of a sea horse-
cow, as we are obliged to call him, is
proceeding along on the muddy bot-
toms of muddy rivers, satisfying his
hunger on the bottom of the land affairs,
making the neighborhood highly un-
comfortable for African gentlemen out
fishing in their canoes. He has no am-
bition beyond that, and if undisturbed
will let the world wag around him and
his own business. Naturalists claim that
he is very docile and affectionate when
in captivity, and that he may come when
he will replace the poodle dog as a pet.
His span of life is supposed to be sixty
years, but that doubtless depends a great
deal on the care he takes of himself. If
the newly discovered elixir of life works
as is hoped for, the sea horse-cow's days
may be extended over a hundred years.
—Detroit Free Press.

There's No Substitute for Leather.

Leather is a unique material. There is
no substance in any way analogous to it.
Flexibility and durability are opposite
qualities that no other product possesses
in such a marked degree. The animal
skin the gelatine and tannin, the animal
and the vegetable kingdom, are com-
bined in an indissoluble union which
will withstand the continuous frictional
wear which shoes, harness, belting, etc.,
are subjected to, and it is this unique
else. It is the one commodity for which
there is absolutely no substitute. Cotton,
wool, linen and silk are to some extent
interchangeable; wood, iron and stone
are frequently used in lieu of each other,
but in no case can the material be inter-
changeable. The leather of the present age,
research and discovery of the present age,
nothing has been invented to supersede
or obviate the necessity for leather. With
the single exception of breadstuffs, none
of the great staples of commerce has
such a numerous constituency. It is the
inhabitant of the country, without regard
to age, sex or color or condition in life,
is to a greater or lesser degree a consumer
of it.—Shoer and Leather Reporter.

Imitations of Old Bronze.

An excellent imitation of old bronze
has been introduced in some of the art
products of that character. It is well
known that the repeated applications to
the face of brass or copper, or the use of
dilute acetic acid and exposure to the
fumes of ammonia result in a very an-
ticipated green bronze; but a more rapid
method of producing this beautiful ap-
pearance has long been a desideratum.
It is now found that this can be accom-
plished by immersing the articles in a
solution of one part perchloride of iron
in two parts of water, the tone acquiring
darkness with length of immersion, or
the materials may be boiled in a strong
solution of nitrate of copper. It is also
found practicable to insure the desired
effect by immersing the articles in a solu-
tion of two ounces of nitrate of iron and
the same quantity of hyposulphite of soda
in one quart of water, drying and burn-
ishing completing the process.—New
York Telegram.

Florida Sponges.

The finest and best sponges in the
world are now obtained along the Flori-
da Keys. Native Floridians do the prin-
cipal gathering. There are some Bahama
Islanders also. The sponge fishers are
called conks. They do their work by ear-
up the sponges with three lined rods or
long poles. A Greek came down from
New York a year or so ago and tried
gathering them by diving, using a regular
diver's suit, but he made a failure of it.
The sponges grow rapidly, and the same
has been fished clean will be covered
with a new growth in six months. The
product amounts to nearly half a million
dollars annually.—True Flag.

Odoriferous Flowers of Europe.

Of the 4,200 kinds of flowers which
grow in Europe only 420, or 10 per cent.,
are odoriferous. The commonest flowers
are the white ones, of which there are
1,194 kinds. Less than one-fifth of these
are fragrant. Of the 951 kinds of yellow
flowers 77 are odoriferous; of the 823
red kinds, 84; of the 594 blue kinds, 13.
Of the 240 kinds with combined colors, 29 are
fragrant.—New York Telegram.

A Dreadful Sight.

Jack (bumping in and out). Oh, girls,
I have seen such a dreadful sight down
the lane. Poor, sweet Lily Jones is hang-
ing on a limb.
Owen—Good gracious! How horrible!
Jack—A policeman.
Jack—Calm yourselves, she still lives.
She hanging on a limb of the law.—
Pittsburgh Bulletin.

JOKING IN EARNEST.

Pranks Which Often Proceed from Serious or Malignant Purpose.

The various professions have their own
records of practical jokes, which too
often proceed from some serious or mal-
icious purpose. One such prank, under-
taken with venal design, was that of
the Belgian painter Wirtz, who, year
after year, sent pictures to the Salon,
only to have them returned, as the
judges, whose duty it was to judge upon
the pictures submitted, would have
nothing to do with him.

Finally he became possessed of a
pennant, which he sent off to the
Salon bearing his own name. It was that
of once sent back to him, and then, as the
phrases go, he had the judges on the
hip, and could taunt them with not
knowing the work of a master when they
saw it.

Another such practical joke was played
upon the late Mme. Rudersdorf by
Sir Michael Costa, the conductor. At
rehearsal one day the lady declared that
she could not sing the part of the
written, but must have it transposed
half a note lower.

"But, madam," said Costa, "consider
the inconvenience, especially to the wind
instrument, and particularly as all my
men cannot be counted upon to transpose
at sight."

But madame was obstinate, and Costa,
shrugging his shoulders, bowed in acquies-
cence.

"Very well, gentlemen," said he, turn-
ing to the bewildered orchestra, "and
closing his score, "To-morrow you will
play it a note lower."

The next day, however, just before
Mme. Rudersdorf came on to sing, Costa
whispered to the orchestra: "In the origi-
nal key! No change." And so it was sung.

At the close of the air the singer turned
to Costa and thanked him warmly.

"I am charmed," she said.

"Madame," replied Costa, with a touch
of pleasant irony, "we are also charmed.
You sang it in the original key."

Had Mme. Rudersdorf's ear been as
unerring as her voice, she would have
noticed the difference between the phre-
nomenal musicians the joke could never
have been successfully carried out, but
the conductor, of course, knew with
whom he had to deal.—Youth's Com-
panion.

Disease in Books.

I sometimes am almost led to believe
that the intellectual home derived from
a public library is outweighed by the
physical detriment," were the words that
fell from the lips of a distinguished
physician a day or two ago, as he rather
gingerly handled a greasy looking vol-
ume that ornamented the mantel piece
of a patient's sick chamber.

"Not only is a bookworm's absorption
often injurious to his health, but it is a
well authenticated fact that disease may
be written between the lines of books, be-
ing subjected to decay and decay. The
average patron of a circulating library is
a person not over-scrupulous as to the
care of a borrowed volume. He will al-
low filth to accumulate rapidly within
its pages, and if a member of the house-
hold be stricken with measles, or
scarlatina, or even diphtheria or small-
pox, like as not the book will find its way
into the presence or the lap of the invalid,
to be transferred thence a little later to
the hands of some unsuspecting reader."

"The leaves of the book easily absorb
the germs of disease that float in the at-
mosphere. Microscopes have brought to
light the fact that bacilli sometimes over-
saturate the covers of books, and in some
periods and comms. The handling of
such a book might be fatal to the reader.
It is not actually known that many ill-
nesses result from such causes, but there
is always the danger."—Indianapolis Sun.

A London Cabby's English.

One of the most amusing talk his
mother tongue in the highways and by-
ways of Paris, Berlin or Vienna, but in
London one hopes at least to be under-
stood, as is often not the case. A Wash-
ingtonian doing the sights of this Eng-
lish capital ordered his cabman to drive
to the Alhambra. "Where is it, sir,"
asked the cabby. "Well, my man, that's
what I don't know and what you ought
to know, if you pretend to know your
business." Poor cabby was nonplussed
and asserted evident mortification that
though he had made his living as a
London cabman since boyhood he had
never heard of such a place as the Al-
hambra. "Why," said the much dis-
tressed, "I don't know, but I know they
have money and dancing and things to
drink." "Oh! it's the Humberia my
man, sir," and with a sarcastic smile on
his face at the pronunciation of his
American cousin he drove to the place
in question.—Washington Herald.

An Interesting Family.

Old Mr. Burton told that Lord
Byron's mother was a fool and his father
was a rascal. He poisoned his first wife,
Lady Carmarthen, who was divorced
from him because her father, Lord Hold-
erness, had his money for nothing more
than to get her into the family. Lord
Byron's mother, though she was told of this,
and had a fortune of £300,000, was
married him. He spent all his estate,
and died with her in a garret at Aber-
deen, supported in a great measure by
her friends, who, when they killed a cow
or sheep, would send her part. She was
always fat. When Mrs. Siddons appeared
in London, Lord Byron took her to his
hysteric fit in the playhouse, clung round
Mrs. Mure's neck, kicked off her shoes,
and was carried out by Mr. Dundas, now
chief baron, and put into Lord Napier's
carriage, and conveyed her, armed with
all the way, to George's square, where
she then resided with Baron Clark's
mother.—Charles K. Sharpe.

Tells on Street.

"I wish I knew how to tell a good
egg from a bad one," writes a young
housekeeper. "They all look alike."
Lord Byron, who was a good egg, told
Clara, look at 'em with your nose. You
must be blind if you couldn't hear the
difference then.—Burdette in Brooklyn
Eagle.

PHENOMENA OF MEMORY.

PEOPLE WHO NEVER FORGET AND SOME WHO COULDN'T REMEMBER.

Mezzofanti was "A Walking Polyglot" and
Master of Languages—Curious Instances
of Memory in Sleep—The Impressions
an Average Brain Holds.

The varieties of memory are as re-
markable as its powers. There is, for in-
stance, so wide a range between Nie-
buhr, the great statesman, and a certain
divine, that one can scarcely recognize
the same faculty in each. It is said of
Niebuhr that he remembered everything
he had read at any period of his life; and
it is said of the reverend doctor that he
forgot he had been married within an
hour after the interesting event.

John Wesley had a remarkable mem-
ory, and at 85, even, it was still vigor-
ous. Andrew Fuller could repeat a poem
of five hundred lines after hearing it
read once or twice, could recite verbatim
a sermon or speech, and enumerate the
names of the shop signs from the Temple
to the end of Chesham, with a descrip-
tion of the principal articles displayed
in each shop window.

Here the days of a northward report-
ing, "Memory Woodfall" used to attend
the house of commons, and, after listen-
ing to a debate, would reproduce the
whole without taking a single note. It
was said that he possessed by William
Radcliffe, the husband of Mrs. Radcliffe,
the novelist.

Both Macaulay and Sir Walter Scott
had prodigious memories, yet neither of
them could compare with Heronius, of
Middleburg, who knew by heart the
works of Virgil, Cicero, Juvenal, Homer,
Aristophanes and the two Plynias. If
this was an example of "rote" only we
have in Mezzofanti, the celebrated lin-
guist of Bologna, one of the most strik-
ing instances on record of what, by dis-
tinction, we call intelligent memory. He
was described by Lord Byron as "a
walking polyglot, a master of languages
and a briar of parts of speech."

At the age of 50 he was thoroughly versed
in fifty languages—perfect in pronuncia-
tion, idiom, grammar and colloquialisms.
—and before his death he added twenty
or thirty more to the list. He used to
say that he never forgot anything that
he either heard or read.

It is recorded of La Fontaine, noted
for his absurd-mindedness, that he once
attended the funeral of one of his most
intimate friends, and shortly afterward
came to visit that friend. When re-
minded by the astonished servant of the
recent death he was at first terribly
shocked, and then remarked, "True; of
course, I recollect now that I went to his
funeral."

A curious instance of memory in sleep
is related by a French writer on dreams.
He says he once saw in a dream a num-
ber of men passing out from a feast.
He observed them all very attentively,
and the face of one struck him so much
that he noted it in his mind. When he
awoke he found that the face he had re-
collected having seen it some days pre-
viously in a book of fashions, which he
had carelessly glanced at and cast aside.

Being an avowed German writer on
mental phenomena, says:
"Waking, I cannot with whatever
effort recall the features of my wife, who
died some twenty years ago; but if I
think of her in a dream, and her image
comes before me, I get the name with the
accuracy that I have again before me
every expression of her fine features in
all her loveliness."

There are endless stories of the hiding
places of missing deeds, and so forth,
being revealed in dreams. Let us take
one as typical.

A landed proprietor in England was
involved in a lawsuit in consequence of
a claim upon his father's estate, which
he was firmly convinced had been dis-
charged. Judgment, however, was about
to go against him, as no voucher could
be found. But one night, in a dream, his
father appeared to him, and said that the
papers relating to this affair had been
placed in the hands of a solicitor he had
not generally employed, but who had
opened to be engaged for this particular
business. In the dream the father said
that if this person had forgotten a matter,
which was already rather old he would
be reminded of it by the mention of a
Portuguese gold coin, concerning the
value of which there was a dispute at the
time. The dream was curiously verified,
as the solicitor only did recollect the cir-
cumstances on mention of the gold coin.
He was then able to produce the neces-
sary papers, and the son gained the suit after
all.

Both Plato and Aristotle have noted
that in old age the recollections of child-
hood are renewed, and it is recorded of
Kant that, in his old age, when general
memory was decayed and infirm, he had
vivid recollections of his youth.

Most of us, probably, have witnessed
some of these instances, and an aged per-
son living in the scenes of the long past
with a mind almost blank to the present.
This is latent memory reawakened, but
with powers of consciousness limited by
an enfeebled brain.

Even at the very entrance of the "val-
ley of the shadow," the memory plays
strange tricks. Goethe told Eckermann
that he once knew an old man who in
his very last moments began to recite
beautiful Greek sentences. These he had
been made, as a boy, to learn by heart
for a special purpose, but for fifty years
had not uttered them. They were there
in his memory, though, all the same, and
some unexplainable cerebral action sud-
denly gave them form and expression.

It is computed by scientists that, since
one-third of a second suffices to produce
an impression, in 100 years a man can
have collected in his brain 9,477,280
copies of impressions; or, if we take
one-third of a second of the time for sleep,
6,311,360 copies, or, if we take 1/100
700,000 separate waking impressions to
the man who lives to the age of 50 years.
Allowing a twentieth of an impression to
brain, and deducting one-fourth for
blood and vessels and another fourth for
external impressions, we can estimate
that each brain of man substance con-
tains 205,842 traces or impressions.
—All the Year Round.

THE FIVE OBEDIENT HUSBANDS.

There were five of them together, and it
was late. They had been drinking. Fin-
ally, one of them looked at the clock, and
said:

"What will our wives say when we come
home?"

"Let them say what they want to. Mine
will tell me to go to the mischief," respond-
ed No. 1.

"I'll tell you what we will do. Let us
meet here again in the morning, and tell our
wives. Let the one who has refused to
do so, let his wife tell him to when he
got home pay for this evening's entertain-
ment."

"That's a good idea. We will agree to
that." So the party broke up, and went
to their respective homes.

Next morning they met at the appointed
place, and began to tell their experiences.

Said No. 1:
"When I opened the door my wife was
awake. She said: 'A pretty little night
for you to be coming home. You had better
go out and sleep in the pig pen for that
stupid, old, drunken braggart. You had
better wake up the children, and stagger
about the room for a while, so they can see
what a drunken man their father is. I have
afflicted with, I thought the best thing I
could do under the circumstances was to
obey; so I woke up the children, and
staggered around until my wife told me to
stop. She used a chair in conveying the
hint. That lets me out.'"

No. 2 spoke up and said:
"I happened to stumble over the pan of
dough, and my wife said, 'Drank again!
Hedn't you better go to sleep, that dough
is so fat down in it, and that lets me out.'"

Next:
No. 3 said:
"I was humming a tune, and my wife
called out, 'There are again! Hadn't you
better give us a concert?' I said,
'Certainly,' and began to sing. As I
could, but she told me to stop, or she would
throw something at me; so I stopped. That
lets me out.'"

No. 4 looked very desolate. He said:
"I reckon I'll have to pay. My wife told
me to do something none of you would have
done, if you had been in my place."
"What was it?"

"She said, 'So you thought you would
come home and I should find you. I
better go out to the well and drink a couple
of buckets of water just to astonish your
stomach.' That was more than I had
bargained for; so it's my funeral."—Texas
Siftings.

THE WHEAT CROP.

The West holds on and is likely to hold
on to its present area of wheat through-
out the present year, and the tendency
toward increase of the wheat crop is
improvement in our methods of wheat-grow-
ing. Improvement will be necessary if, as far
as wheat is concerned, our farmers are to hold
the present level of their living for beyond
this present year, and present prices are
unremunerative, and on this basis must
inevitably lower the plane of farm life with
us.

Improvement is sought not in radical
change of methods but in conservative
advances, and often in makeshift ways.
Change is not a new thing, but it is a
new thing in the sense that it is a new
aid, under the belief that the sort of grow-
ing has deteriorated. I am not infrequently
asked to furnish seed to parties affirming
that their wheat is sometimes better than
it is a probable indication that the farmer
has in a measure run out, or in other words,
it is almost a sure indication of poor farming.
Our lands naturally, as sometimes they
are exhausted and the crop gradually be-
comes reduced in yield. This is often
the case with the wheat crop. The fall
wheat the first three years that I grew
it in Missouri yielded 164 bushels per acre,
and for the next three years 39 bushels per
acre. This change was not in the season
but in the methods of farming, a complete
reorganization of the system found in vogue
elsewhere lifted the level up.—American Agri-
culturalist for October.

CATARRH.

CATARRHAL DEAFNESS—HAY FEVER.

A NEW HOME TREATMENT.

Sufferers are not generally aware that
these diseases are contagious, or that they
are due to the presence of living parasites
in the lining membrane of the nose and
throat. Microscopic research, however,
has proved this to be a fact, and the
result of this discovery is that a simple
remedy has been formulated whereby
catarrh, catarrhal deafness and hay
fever are permanently cured in from one
to three simple applications made at home
by the patient once in two weeks.

N.B.—This treatment is not a sniff or
an ointment; both have been discarded by
reputable physicians as injurious. A pam-
phlet explaining this new treatment
is sent on receipt of ten cents by A. H.
Dixon & Co., 303 West King Street,
Toronto, Canada.—Toronto Globe.

Sufferers from Catarrhal troubles should
carefully read the above.

The professor of geology in the University
of West Virginia declares that the current
fall of the failure of natural gas is idle and
without foundation. From his protracted
study and investigation, aided by the best
scientific resources, he has asserted that
the production will largely increase for
years to come.

ADVICE TO MOTHERS—Are you disturbed
at night and broken of your rest by a sick
child suffering from the effects of
"Teething"? If so read at once and get a
bottle of "Mrs. Winslow's Soothing Syrup
for Children." It will relieve the poor little
sufferer immediately. Depend upon it, it
mothers, there is no mistake about it. It
cures Colic, Wind, Diarrhoea, regulates
the Stomach and Bowels, cures Wind Colic
softens the Gums, reduces inflammation,
and all the troubles incident to the whole
system. "Mrs. Winslow's Soothing Syrup
for Children" is pleasant to the taste and
is the best medicine for children, and is
used by the best female physicians and nurses in
the United States, and is for sale by all druggists
throughout the world. Price twenty
cents per bottle. Beware of cheap imitations.

LOCAL ITEMS.

Next Thursday is All Hallow's Eve.

Monday next is St. Simon and St. Jude's day.

Bread is selling at nine cents in Hamilton. Too cheap.

Sunday next is the nineteenth Sunday after Trinity.

We were indulged with a slight flurry of snow on Tuesday.

Saturday is the eighty ninth birthday of Count Von Moltke.

To-day is the thirty fifth anniversary of the battle of Balaklava.

Sunday night Sucker Creek was frozen over for the first time this season.

Several more weddings are spoken of as likely to occur in the next few weeks.

Mr. R. Geddis is giving his house a coat of paint, terra cotta being the colour.

The Bishop of Ontario has moved into his new residence on Earl street, Kingston.

Mr. Indian Agent Hill paid a short visit to Ottawa last Monday on official business.

The Kingston Foundry and Machinery Company is seeking incorporation. Capital \$80,000.

George Robbs, for seven years a deck hand on the Hero, was drowned at Kingston yesterday morning.

The sharp frost of Sunday night caused the leaves to fall in myriads, and the trees are rapidly becoming bare.

The members of Court Deseronto, I. O. F. will assemble at their hall at 6 o'clock Sunday evening, before proceeding to the Church of the Redeemer.

On Tuesday a farmer's pair of horses frightened by the motor car ran away from the Cedar Mill and proceeded up Main street at a lively rate. Fortunately no one was injured.

Work has been commenced on the new railway stations at Marlbank and Larkins on the line of the N. T. and Q. Ry. The foundations of other stations are also being laid by the masses.

Mr. Drewry, of the Express, was in town yesterday. He was all packed up to go from Napanee to Pictou by the Quila on Wednesday evening, but at the last moment was unfortunately detained.

The Messrs. Manley have finished the mason work of the new high school building, the architect having accepted the same as satisfactory. These well known contractors have had a busy time in Deseronto during the past season.

In connection with the late accident in Napanee, it is stated that there is no light on Centre street within the next three blocks of the dangerous railway crossing on that street. The Council are sorely criminally negligent, if such is the case.

In an address to the young people confirmed at Belleville on Sunday, Archbishop Cleary stated that he was very anxious about the boys. They had so many temptations. Bad company would change a good boy into one of bad habits. Night roaming and drink were to be avoided.

Captain Cuthbert is building a yacht which he expects will prove the fastest on the lake. The vessel is now under way at Cobourg. Her dimensions are: 45 ft. keel, 46 ft. load water line, 53 ft. over all, 15 ft. beam, and 5 ft. 6 in. draught. She is to be very rigid, with lead ballast and best American dock sails.

Messrs. Harrison and Jamieson, of the Belleville Intelligencer, drove down to Deseronto on Wednesday night. When near the town the wreck of a wagon which had been carelessly left on the side of the road frightened the horse which ran away and upset the two journalists who got rudely shaken up and received a few scratches and bruises.

Senator Turner, of Hamilton, is dead. He was a man greatly respected in the private relations of life. There are now seven vacancies in the Senate. Why fill the vacant seats? The Senate is a criminally useless branch of the Dominion parliament. If, as is proposed, a divorce court is established, there will be absolutely no business for it to transact.

It will be remembered that on the 20th of July a fracas occurred in the yard of the Royal hotel, Napanee, during which a shot was fired from a revolver at one Frederick Sagar, the ball grazing his leg and tearing his clothes. Samuel Letters, who has been working on a farm in Sidney has been arrested as the person who used the revolver on the occasion.

In a small town in Wales a minister closed his sermon the other day with these words: "We would be pleased, moreover, to have the young man who is in now standing outside the door come in and make certain whether she is here or not. That would be a great deal better than opening the door half an inch and exposing the people in the last row of seats to a draught."

With the death of Mr. Robert Stanhope there disappears a well known figure from the streets of Deseronto. The deceased was well known all over the district. He was a native of Liverpool, England, and was much respected by all classes. He was a devoted and consistent member of the Orange Order, a brother never ashamed of his colours. The funeral took place on Tuesday, the remains being interred in Christ Church cemetery.

The General Convention of the Baptist Church in Canada, which was in session this week at Ottawa, passed a unanimous motion against all tax exemptions. It must be said to the credit of the Baptist Church that its aggressive character, and no other action could be expected. All tax exemptions should, and will be, abolished. Churches and all church property should be taxed. The fact that the Church is exempted from its share of taxation and that it receives aid so often from the state is the fruitful cause of untold evils.

A young man under the influence of liquor thinking it was his boarding house, broke into Mr. Wm. Lendowich's residence. Hearing the noise Mr. Lendowich supposed it was a burglar and got up to capture him. Mrs. Lendowich while lighting the gas caught sight of him and feared that did also her daughter and both were in a state of nervous prostration for a day or two afterwards. Mr. Lendowich recognized the offender whom he threatened administering a good spanking and ejecting from the premises. The Chief shut him up the next day, but as he had been drunk his story was taken and he was discharged.

Noah Did Not Starve.

At confirmation on Sunday in Belleville Archbishop Cleary came to one of the dead and dumb institute boys. He said that Murray called out as Noah, "That's a pretty old name, my lad," remarked his groom, as he prepared to perform the ills rite, but the boy's face showed no more response to the remark than would have been expected from a gray insensate. His grace looked puzzled, but passed on to the next.

Ball and Supper.

The members of Branch 86, C. M. B. A., will give their first ball and supper at their new hall, Main street, on Wednesday evening, Oct. 30th. Supper will be given at the Oriental hotel. Tickets to ball and supper, \$1.00. All are welcome and a good time is guaranteed.

Harvest Festival.

The harvest festival in connection with St. Philip's Church, Milford, will be held at 4 p. m. at which Rural Dean Loucks will be the preacher. Tea and concert in the town hall at 8 p. m. A large display of talent will participate. The Deseronto Church Society will assist. Proceeds to be devoted to the collection of the shed.

Casualties.

On Monday evening Simon G. Woodcock, of the Cedar Mill, was engaged piling four foot wood on a car. The car being loaded the teamster hitched on his team supposing that Woodcock was off the load. The car coming under the log axle caught Woodcock and threw him off with his feet on both elbows, breaking both arms, one above the elbow and the other below. Dr. Newton attended to his injuries and he is progressing favourably.

Excellent Samples.

Mr. T. Sullivan, of Hungerford, the other day sent us some huge samples of Bartlett pear grown from a tree which had been grafted on a thorn bush. They were the largest pears we have seen this season. He had one pear which measured 14 1/4 inches in circumference and weighed 12 ounces. Mr. Robert Crawford, of Hungerford, also kindly sent us some samples of Snow Flake apples and some huge specimens of the same fruit of a different variety. They have been on exhibition at THE TRIBUNE office and elicit expressions of admiration from visitors.

Church of the Redeemer.

The service of song in the Church of the Redeemer last Sabbath evening was descriptive of the lives, character and hymns of Bernard of Clairvaux and Bernard of Clugni in the 12th century. The choir sang two very fine anthems. A sermon will be preached to the members of Deseronto Court, on Tuesday evening next.

A request has been made to have the sermon of last Sabbath morning on the "Sabbath" published. The choir of this church practices on Tuesday and Saturday evenings.

Applications for sittings should be addressed to Mr. L. Hopkins, treasurer of the board of managers.

Government Buildings.

We regret that the members of the town council did not take action at their last meeting in reference to the proposed new post office and custom house for this town. Time is passing and if nothing is done very soon no will be placed in the building for the purpose, and Deseronto will find itself once more left in the lurch. Governments only give credit on the basis of security. A long continued pressure being brought to bear, Deseronto expects to secure a beautiful post office "delegation" must be sent and other steps taken to enforce our claims on the government. As Deseronto is a town governed by petitions, why not get up a petition, call a public meeting, and appoint delegates to take other action?

Cleopatra's Needle.

Last week one Edward Maloney from parts unknown engaged with A. Campbell, Marysville. On Monday morning he went out to plough, but, giving a paltry excuse, soon gave up the job. He told Mr. Campbell to examine his satchel to see that he had stolen nothing. Mr. C. did not think it necessary. After he departed, it was discovered that he had stolen \$20 from young Campbell's vest pocket. An alarm was given and the police in Napanee, Deseronto, etc., notified. Mr. A. L. Chandler, of this office, going down on the mixed train spotted Maloney from the description given, and informed the police in Kingston. Maloney was arrested, identified, and found guilty by the court. He has sent him off for trial at the next court.

Wedding Bells.

A very pleasant event which has been looked forward to with much interest for some time past took place on the evening of Wednesday, 2nd inst. At eight o'clock that evening Mr. Isaac Allum, Jr., of Deseronto, was united in marriage to Miss Hattie, daughter of Mr. S. B. Bowen, of Richmond. The ceremony which took place at the residence of the bride's father, was performed by Rev. R. J. Craig, pastor of the church of the Redeemer. The bride looked charming and wore a travelling dress of fawn cloth. She was attended by her sister, Miss Jennie Bowen, who was similarly dressed and carried a bell of flowers in her hand. The groom was supported by Mr. W. A. Macleod. After the ceremony the wedding party to the number of sixty sat at a sumptuous dinner and spent a most pleasant evening. The bride was the recipient of a great number of handsome presents, including a silver water set presented by the choir of the Church of the Redeemer, of which she was a member, and a handsome china tea set presented by Rev. R. J. Craig and Mrs. Craig. The happy couple left for a tour to Kingston, Ottawa and other points. THE TRIBUNE and a host of friends united in wishing the young couple a very happy wedded life.

St. Mark's Church Notes.

On Sunday last by request of the Wardens and Finance Committee the assistant, Rev. Mr. Patton, preached special sermons on the "Duty and measure of Giving" as inculcated in the Word of God. The preacher while commending the liberal spirit which has animated the congregation in the past went on to prove, in a plain and forcible manner, the duty and expediency of system in church offerings, and the Divine authority which may be adduced for the giving which, could the church but attain to such wholeness of supporting religion (especially such as evoked the disapproval of the late Provincial Synod) would be swept away. A clear and terse statement of present financial obligations has been issued by the Committee in a circular which further asks every attendant of the church to adopt the envelope system and thus to co-operate in the earnest effort now being made towards liquidating the debt. It is hoped that such an increase in the financial contribution (and if possible double that formerly) in the collection on every Sunday, at least during the next season, will now and hereafter. On Tuesday afternoon the funeral of the late Robert Stanhope took place from St. Mark's church, the interment being at Christ Church (St. Mark's) graveyard. A ladies' committee of the congregation are preparing to hold an oyster supper and concert at St. Mark's on next Thursday evening, from half-past seven. The ladies expect there will be a large attendance on the occasion. On Wednesday evening Mr. H. C. Fawkes, the efficient leader of the choir, and Miss J. Stewart were married in St. Mark's church by the pastor. We tender herewith our best wishes to the happy couple. The wedding will be the Eve of St. Simon and St. Jude, (speakes), and married while the following Friday, Nov. 1st, in All Saints' Day.

PERSONAL.

Mr. James McDiarmid was visiting in town this week.

Mr. James Williams, of Lonsdale, was in town on Wednesday.

Mr. and Mrs. S. Thompson are visiting friends at Sydenham.

Mr. N. M. Vermilyea, Reeve of Thurlow, was in town on Tuesday.

Mr. Jacob E. Rathbun, of Solmesville, was in town on Saturday last.

Miss Fairbairn, of Montreal, is the guest of Mrs. Robert Geddis, Main St.

Our old and esteemed friend, Captain Munson, was in Deseronto Friday last.

Rev. Father Hogan was visiting Rev. Father McDonough, at Pictou, last week.

Mr. Patrick Dwyer, of Bay View Ranch, has been spending a few weeks in Crofton.

Dr. A. P. Johnson, of Toronto, was a guest at Bay View Ranch on Sunday last.

Mr. James P. Walsh, of Tyendinag, paid a short visit to Deseronto Wednesday last.

Mr. William B. Ferguson, of Ferguson Brothers, Napanee, visited our town on Monday last.

Mrs. George Evans returned home from Quebec on Monday last after a lengthy visit to her parents.

Mrs. John Mix, of Toronto, a former resident of our town, was visiting here on Thursday.

Mr. and Mrs. J. B. Rathbun, who had been on a visit to New York, returned home on Tuesday morning.

Mr. William R. Northrup, barrister, Belleville, visited our city last week on professional business.

Inspector McGill, of the Rathbun Company's Agencies, went to Cobourg Friday last on official business.

Mr. Miles Sweeney, of Lonsdale, accompanied by his daughter, Miss Sweeney, were in Deseronto on Thursday.

Mr. William Kerr, of Campbellford, was in town on Tuesday on a short visit to his mother, Mrs. J. Kerr and his sister, Mrs. F. S. Rathbun.

Mr. Wm. Haynes, of Alpernton, Near Harrow, England, arrived in town last week. He is a brother-in-law of Mr. E. A. Risen and will probably make his home in Canada.

ROBINSON & CO.

COLUMN.

Two Large Stores

IN ONE!

RIGHT!

RIGHT!

RIGHT!

Right Every Time.

Continually making improvements for the convenience of our customers. Continually watching the markets to procure the goods you need. Continually watching to see that the values are right. Continually watching that everything you buy from us is perfectly satisfactory.

We have reached the point where it will be necessary for you, if you serve your own interests to buy from us. ROBINSON & CO.,

CHES.

BY J. H. ROYCE, FANTON, M. A., PROFESSOR OF NATURAL HISTORY AND GEOLOGY, GUELPH.

Questions are repeatedly sent to the College asking for information concerning ches. The answers to these inquiries are as follows: The ches is a small, round, greenish plant, about the size of a pea. It is found in various parts of the province who maintain that it is a modification of the wheat plant, brought about by winter killing of the wheat, it will not be such a matter of surprise that I should deem it expedient to write something about this apparently doubtful member of the grass family, endeavoring to show that it is a species (*Bromus secalinus*) just as much as any other plant, and that it does not depend for its existence upon a modification of wheat plants growing in adverse conditions.

Much discussion has taken place regarding its origin in some other way than a plant perpetuated by its seed. As it usually appears among fall wheat that has been winter-killed, it seems quite natural to suppose it is a degenerated condition of the wheat, and there are not a few farmers who insist upon this as being the only correct explanation of its presence under such circumstances. Thus it is that few questions at a Farmers' Institute will lead up to a more lively discussion than that which deals with the origin of ches.

It seems remarkable that, if this is the true origin of the plant, one cannot readily grow it from wheat, while there is no difficulty whatever in growing it from the seed of ches. Those who sow wheat containing ches never fail to get a good crop, while those who are very careful to grow clean seed are troubled with it.

The following are some reasons why a person should be ready to conclude that this plant is not an exception to others and depends for its perpetuation upon the seeds which it matures:

1. The plant is widely different from wheat in appearance; so much so that botanists place it in the genus *Bromus*, while wheat belongs to the genus *Triticum*. Couch grass (*Cynodon*), being in the same genus as wheat, comes much nearer in its characters than ches does, and yet no one ever hints that it is derived from wheat. If ches is a degenerated condition of wheat, we might reasonably expect some resemblance to the plant from which it was derived.

2. The most developed evolutionist does not expect to see development in the short space of a few months, owing to the effect of frost, a plant so unlike in structure, form and habit to that of which it is derived. It is only through long periods of time that such modifications in a plant can take place as to change its character so much that it may be viewed as a new species. But in this case one season brings about such a remarkable change that the plant is ranked in another genus—a more comprehensive term than species.

3. If ches is sown it yields ches. If it were degenerated wheat, and sown under favorable surroundings, it should soon return to wheat; for we observe both in animal and plant life that a deteriorated form will return to its proper nature when conditions are suitable for growth. Some have gone so far as to say ches will not grow from seed, but this is a mistake, as can easily be seen by sowing some of the seed.

4. Ches will mature seed under adverse conditions, though the plant is only two or three inches high; while wheat, which is so much more favorable to it, grows three or four feet high before seed is matured. This may account for its never being seen in good crops, while it may be seeding in the vacant soil under suitable time, when the crop in which it is seeded is injured by frost; then this hardy annual, the seeds of which possess great vitality is ready to take the place of the crop, yield a crop no longer hid from the farmer's eye.

5. The conclusions arrived at by all men who make plant life a special study are, that ches is a typical plant, producing seed that gives rise to plants of the same character; (6) that a seed of ches cannot be sown so as to produce ches, and (7) that ches cannot produce wheat under the most favorable conditions for growth.

6. In instances where a part of a plant, apparently a combination of ches and wheat, were so mixed as to seem but one plant, close examination proved them to be parts of separate plants, and that the apparent union was not real. In some cases microscopic examination has been required to prove it.

7. Wheat has been grown in some places and often winter-killed and no ches has appeared. There are places where ches is unknown, and where it grows in abundance all the vicinities which seem favorable to the development of this weed in other parts where the weed is common. Farmers care full in using clean seed often have winter-killed wheat unaccompanied by ches.

8. Liberal rewards have been offered for agricultural papers to any one who could bring conclusively to the ches is derived from wheat, and as yet no successful competitor has appeared, though as high as \$500 was the price.

With these facts before us, it does seem difficult for a person to accept a theory which demands greater concessions than the most sweeping form of evolution. Though this plant may appear under conditions so difficult to explain, we are forced to believe that its origin is carefully considered it will not require one to pin his faith on views so antagonistic to the teachings of science as those required to be accepted by persons claiming wheat as its source.

NEWS OF THE DAY.

Jay Gould is reported to be in poor health. The Shah of Persia has returned to Tehran.

Two inches of snow fell at Rat Portage on Friday night.

The Pan-American delegates were at Milwaukee Friday.

The jury in the case of the Cronin Suspects is not yet completed.

THE SMEAD SYSTEM.

The Daily Herald of St. Joseph, Mo., thus describes the Smead System of ventilation as exemplified in an eight room school building in that city. This system will be used in the new Deseronto High School. The air which circulates through the building first enters the basement through open windows into the fresh air room. This room is kept up and air in the building is not tainted. It is here heated and passes on through shafts to the rooms above. In each room a number of small ventilators are placed in the baseboard above the floor and the air, as it becomes cooled and fouled, sinks and passes out these openings. Such artificial aid to circulation as is needed is calculated in made from an anemometer test, which showed the air to be moving in at a rate which would furnish an entirely fresh supply every eight minutes. From the foil air ventilators the air passes down into the foul air chambers and passes under the vault seats, completely drying up excrement, and it then passes out of the building immediately through the vent shaft. The passage of the air through the building is so continuous and so rapid that the air of the so-called foul air chamber keeps seemingly pure.

The current from all surrounding parts is directly towards the vault chamber, whether from the seats above or from the foil air chamber on the side. A constant current in these directions out of the vent flue is kept up, and air in the building is not tainted from them in the slightest. One of the tests made to show the rapidity with which the air circulated was pouring wet drops of penicillin on the floor of the fresh air room. In two and one-half minutes it had circulated throughout the building and had returned to the fresh air room. In the summer time when it is not desired to use the furnaces, the air passes directly from the fresh air chamber to the rooms. Such artificial aid to circulation as is needed is furnished by a fire built under the vent shaft. This keeps up the movement of the atmosphere as well as is done by building a fire under the entire furnace. So far this has been the only fire needed.

In each room the regulation of the current is under direct and easy control of the teacher. Warm and cold air both enter by the same shaft and the regulation of either by the teacher is no very difficult matter, as with the current in other rooms. In the Year building there are four furnaces, but two to be used at a time, excepting in extremely cold weather.

This school building seems well constructed, well lighted and well adapted to its purpose. It is a fine example of the Smead System for heating and ventilation cost \$250. The cost of the building was about \$1800 less than the estimated cost by the architect, and the board feels pleased that it has secured a few facilities as it has for the money expended.

FARMERS AND MILL MEN.

McColls' Celebrated
LARDINE OIL MACHINE

Is the Only Safe and Sure Oil for Self-Binders, Threshing Machines, and Mill Machinery generally.

Manufactured by McCOLL BROS. & Co., Toronto, Ont.

Canada Life Assurance Co.

ESTABLISHED 1847.
HEAD OFFICE, HAMILTON, ONT.
Capital and Funds nearly \$10,000,000. Annual Income nearly \$1,800,000.
Managing Director, A. G. RAMSAY.
Secretary, R. HILLS. Superintendent, ALEX. RAMSAY.
SOMETHING ABOUT PROFITS.

EXAMPLE I.	EXAMPLE II.
1850.	Here is another, taken out five years later, viz: 1855.
Policy 499—\$2,000. Premium, \$78.67.	Policy 1752—\$400.00. Premium, \$13.87.
1885.	1885.
Yearly Cash Profits, - - - \$187.97. Deduct Yearly Premium, - - - 78.67. Leaves Net Yearly Payment to Policy-holder, - - - \$109.30.	Yearly Cash Profits, - - - \$21.14. Net Yearly Payment to Policy-holder, - - - 7.27. - - - \$14.87.
In 1850, a gentleman living not 100 miles from Montreal, took out this Policy on the ordinary Life plan, applying his profits to the permanent reduction of his premiums. The profits had gradually reduced the annual premium until it had diminished in 1875 to \$13.87.	EXAMPLE III. And one more, five years later still, in 1860.
In 1880—payment of Premiums had altogether ceased.	Policy 3088—\$3,000. Premium, \$108.90.
Not only this, but he was thenceforward in receipt of an annual income from the profits of \$35.20.	1885.
In 1885 his income was increased to \$109.30 per annum (as above), and in 1890 this will be again largely increased, the net income from the profits of the policy until the Policy becomes a claim.	Yearly Cash Profits, - - - \$127.52. Net Yearly Payment to Policy-holder, - - - 17.62. N. B.—In this case a portion of the profits was taken in anticipation. Had this not been done, the net income would have been increased by - - - \$8.52.

Raising the net surplus income to - - - \$27.14.

MEMO.—In the cases above quoted, as in all others where the profits are taken in this way, the profits at each division are added to those previously declared and are paid annually to the holder, until the Policy becomes a claim.

Mrs. Col. Campbell
SAYS OF THE
Bell Piano

Belleville, Sept. 16, 1899.
Mr. Henry Bull,
DEAR SIR:

I have great pleasure in adding my testimony to that of many others, as to the merits of the "Bell Piano." I may say that I have had one since the 1st of May, and am more pleased with it all the time. It has a very good touch and is brilliant and sweet in tone, and is also very good for accompaniments to the voice. Yours truly,
JULIA CAMPBELL.

H. BULL, Agent.
Box 89, Belleville, Ont.

The Tribune

FRIDAY, OCT. 25, 1899.

LOCAL ITEMS.

It has been demonstrated that sixty good hens are as profitable as two milch cows.

The Rathbun Company have been shipping large quantities of railway ties from their Campbellford mill.

The Bell telephone poles in Pembroke, we may remind our town councillors, have been painted a sort of pea green color.

As Adam remarked to Eve as they sat outside the garden gate: "We've had an unusually early fall, have we not?"

The newspaper men of Eastern Ontario meet at Carleton Place to-day for the purpose of organizing a press association.

Mr. W. C. B. Rathbun, of Bay View Ranch, has purchased a handsome pair of black horses from Mr. Wm. Barnie, paying a goodly sum therefor.

Mr. John White, ex-M. P., in an interview at Winnipeg, says nineteen-twentieths of the Orangemen of the dominion support the educational platform of the Manitoba government.

The Bishop of Ontario has appointed the deacons who were ordained last week to the following charges: Rev. A. E. Celay to Combermere; Rev. Mr. Norris to Palmerston; and Rev. S. Hayne to Navan.

Archbishop Cleary will be installed next month when he will be presented with \$10,000 to be used in the erection of a chapel in rear of the cathedral. The money will be raised by the clergy and the people of the diocese.

A horse weighing 3000 pounds, twenty and one half hands high, and seven feet eleven inches in girth, has been exhibited in Portland, Oregon. He is a Clydesdale, five years old, and is described as absolutely perfect in proportion.

We have received from the publishers a copy of the *Christian Guardian*. The *Guardian* is ably edited and contains a large amount of religious and general information. Every Methodist family should subscribe for this great religious weekly, if they desire to keep posted on the great operations of their church.

Mr. James R. Booth had a close call the other day. While passing along near the track at the corner of the General Offices of the Rathbun Company, he was struck and hurled to one side by a Bay of Quinte Railway engine. His arm and ankle were crushed, but otherwise he was fortunately escaped without serious injury.

Catharine McLaughlin, an inmate of the Regiopolis asylum, Kingston, jumped from one of the windows of the asylum, on Monday morning, and killed herself. There must have been criminal negligence somewhere or the windows would have been so protected that such a thing would have been impossible.

More Charcoal Kilns.

Mr. Jas. R. Booth has secured the contract for the erection of two additional charcoal kilns at the Chemical Works. They will be 40 ft. in diameter, each will require 35,000 brick in its construction.

An Entertaining Journal.

The *Napaneer* has published a supplement last week. It was well illustrated and contained interesting biographical and business sketches. The *Journal* must be complimented on its enterprise which cannot but prove remunerative.

The Only Way.

The Ontario states that Belleville was troubled with farmers and others selling apples and potatoes in bags less than the law requires. The health inspector took up the matter and bringing a case into the police court soon effected a remedy. Who will apply the remedy in Deseronto?

Exorbitant Railway Fares.

The new railroad law has gone into effect in Michigan and only two cents per mile can now be charged for carrying passengers. Railway fares are exorbitant in all parts of Canada. The people have most generous subsidies the different railways of the country. The railways have not appreciated their kindness. As they own our parliament there is but little hope of any legislation similar to that of Michigan.

For Our Sleepy Town Council.

The Canadian Pacific Railway Company are painting the street telegraph poles at Arnprior in accordance with the request of the council. The *TRIBUNE* urged our town council to demand similar action on the part of the telegraph companies who have spoiled the appearance of our streets by planting unsightly poles thereupon. But our council appears to have a few of corporations and have, therefore, as usual done nothing.

Belleville Jail.

Prison Inspector Christie says Hastings county jail has the toughest class of prisoners in the land. There is not awaiting trial for murder, one for perjury, seven for larceny, one for aggravated assault, one for house breaking, one for rape, with the usual drunks and five lunks in the County of Hastings is becoming notorious for its increasing number of criminal cases. To what may we attribute this sad state of affairs. Much of it is due, no doubt, to negligence on the part of parents who appear too generally to exercise no control over their boys and girls.

A Curious Discovery.

Saturday last while excavating Gilmour's part of the flume the workmen unearthed a natural well in the solid rock 3 ft. 10 in. by 3 ft. 3 in. and feet deep.

Over the well was a shell of rock and it was filled with gravel and pebbles similar to those found on the lake shore, which are evidences of the action of the water as well as the sides of the well which were smooth as the sides of the lake shore, as soon as the gravel was taken out, it filled up with water which appeared to be different from the water in the river although only a few feet away.

Killed at Napane.

The White states that Saturday night a young man named Russell Toft, belonging to Collingwood, attempted to board a freight train at Napane and was thrown under the wheels of the car. Both legs were broken and severed from the body. He was killed and taken to the hospital at Collingwood. He was taken to an undertaker's establishment and removed to his late home to-day.

Toft, it seems, missed the train at the station and going to the Centre street crossing tried to jump on but the train going down had already started.

The other lower down. The young man was a school teacher at Collingwood. He attended the high school at Sydney, and was considered a bright student. He lived with his grandmother, Mrs. Graham, of Edinburgh.

Reader to Counsel.

Chief (Jury), Collector of taxes, is now at work. He will receive payment of taxes at his house on Green street at any hour of the day or evening.

Promotion Examinations.

Mr. John Johnson, public school inspector for South Hastings, announces that the next entrance examination to the high schools or fifth class will be held at Deseronto, Belleville, Trenton and Tweed, on Wednesday, Thursday and Friday, Dec. 18th, 19th and 20th.

Belleville will have the list of candidates who will write, stating place where they will write, not later than November 1st.

Moderate to Frugal.

Next Sunday morning immediately after the morning service in Christ Church, Mohawk Road, handsome silver models, which have been forwarded by the New England Company, will be presented to Mrs. Dow Claus and Chief Sampson Green, an ex-pupil of the Board of Institute who have in many ways did honor to that institution which is supported by the Company.

The Population.

We observed a drove of hogs rooting among the graves in the Molok cemetery, the late day of the day, and hence not proving a barrier to their ingress into God's acre. The present state of the burying ground is discreditable alike to the Indian Council and the friends of the dear departed who find there a final resting place.

With the exception of a few plots, nothing but a painful neglect reigns. The *TRIBUNE* has time and again endeavored to wake up the Indian Council from its long slumber, and to shame the residents of Deseronto, the vicinity, who have buried friends there, to do something, but alas, hitherto, all in vain.

Escaped.

Tuesday the chief received a telegram from the officials of the penitentiary in Kingston informing him that Le Page, one of the convicts, had escaped from that institution.

Le Page was engaged with several others ploughing in the penitentiary farm and was in charge of W. Bell. Mr. Bell wanted a wrench that was in a barn some distance away. He sent Le Page for it, but he failed to return. After a short absence Mr. Bell went to look for him but could not find him.

A search was instituted for him at once but thus far without success. It is believed that he was assisted in his escape by outside parties. It will be remembered that Le Page was the man who issued the counterfeit money in Deseronto and vicinity and was for that crime sentenced to two years in the penitentiary.

TOWN COUNCIL.

A meeting of the town council was held in the town hall on Thursday evening, 17th inst. Present, the Mayor, Reeve, Councilmen Cameron, Whittow, Valleeau, Richardson, Cronk, Dalton, Dryden, Carter and Irvine.

In the absence of the Clerk, councillor Richardson was appointed clerk pro tem.

A number of communications were read, including one from Mr. John McCullough, assessor, asking for an increase of salary: from the School Board asking the council to take action on the holding of elections of their board on the same day as municipal elections; and from Mayor Erratt, of Ottawa, asking that the council send a delegation to the general meeting to be held at Toronto to discuss the assessment act.

The council then proceeded to discuss three communications. The Reeve considered that owing to increased work, the assessor should be paid a larger salary and moved, seconded by councillor Cameron, that he be paid \$75.

Reeve Aylworth moved, seconded by councillor Cronk, that the council take no action on the request to attend the Toronto meeting.

There were then read the following petitions: from C. J. Pallie and 22 others asking for a boardwalk on the north side of Dundas street from the corner of Mill street to the corner of S. C. Whaling and 77 others, asking for a by-law to regulate the sale and weight of bread; from Rev. T. Stanton and 57 others, requesting a lamp to be placed at or near the grounds of S. Mark's Church; from J. Carwell and 32 others for a lamp at N. E. corner of Dundas and Mill streets; from F. H. Sims and 33 others for a lamp at S. W. corner of Dundas and Second street; and from E. Edwards and 7 others that the lamp at Mr. Frost's house be moved farther north and lighted.

Councillor Dryden moved, seconded by Councillor Carter that no more boardwalks be laid at present; Councillor Richardson moved in amendment that boardwalks be laid on North side of Dundas street from I. Allum's to the corner of S. C. Whaling street.

The Reeve reported that the matter be left to the street committee. Councillor Richardson's amendment was carried on division, yeas 10, nays 4.

The Mayor, Cameron, Cronk, Irvine, Dalton, Whittow, Valleeau and Richardson: says—Carter, Dryden, Valleeau and Aylworth.

On motion of Reeve Aylworth, seconded by Councillor Cameron the petition annexed bread by law was referred to the committee on streets.

The Reeve seconded by councillor Dalton moved that street lamps be left with committee on Gas with power to act. Moved by councillor Cameron, seconded by councillor Carter, that the matter be left to the street committee. Councillor Richardson's amendment was carried on division, yeas 10, nays 4.

The Mayor, Cameron, Cronk, Irvine, Dalton, Whittow, Valleeau and Richardson: says—Carter, Dryden, Valleeau and Aylworth.

DISTRICT ITEMS.

The stmr. Rothess will be raised this fall.

Richard Palmer, an old resident of Stoco, is dead.

The railroad bridge over the Moira is now completed.

The maple lantern season has set in at Belleville.

Smith's Falls wants its streets named and houses numbered.

It is proposed to extend the K. & P. Ry from Renfrew to Ignaville.

Mr. Edward Merrill has been gazetted county judge of Prince Edward.

Belleville will vote on the bonus to the Rolling Mill Company on the 29th of November.

Carleton Place is leaving its rival towns behind: its population is 4,435, while that of Pembroke is 4,252.

About two tons of frogs' legs have been shipped from Hastings to New York during the past four months.

Rev. W. H. Barnes, of Barrie, has been called to the charge of the Reformed Episcopal Church in Belleville.

The editor of the Belleville Ontario is eating an ear of corn fifteen inches in length and nine inches in circumference.

Albert College has been presented with a large volume. It weighs thirty-three pounds and was taken from a tree near Flinton.

St. John's church, Brookville, was entered on Sunday and the box which contained the collection was broken open. This is the second time this year that the box has been broken into. On Monday night the Roman Catholic church was also entered and the collections abstracted.

THE NEATEST, CLEANEST AND MOST COMPLETE STOCK OF DRY GOODS EVER SHOWN IN NAPANEE MAY NOW BE SEEN AT

Hooper & Doxsee's.

ONE OF OUR GREAT SPECIALTIES IS

DRESS GOODS!

IN this department we are showing a very complete range comprising the very latest novelties, all in good standard and reliable makes.

Bordered Dress Goods are the latest craze. We may say we are a season in advance of the trade here in showing our elegant range of Bordered Goods for the spring trade. For fall trade our stock is simply magnificent. We are selling—not only showing, but selling, and selling freely, a line of Bordered Dress Goods at 65 cents per yard, which customers tell us other houses are asking \$1 for. We offer better ranges of these goods up to \$1.50 per yard.

Love's Goods.

One of the members of our firm visited the wholesale markets this week, and secured the best of the new season's Fine Fashionable and Stylish Dress Goods at less than 50 CENTS ON THE DOLLAR.

We offer a line of All Wool Dress Goods in black and all the new colorings at 20c., which are cheap at 30c. We are offering a line of black and white large plaids, all wool Dress Goods, double fold, at 40c., worth \$1 per yard.

We are offering a line of Amazon Cloths, extra wide double-fold goods at 50c., which you cannot buy elsewhere less than 75 to 90 cents.

We show a line of Pattern Dresses, containing 10 yards, fine French double-width Goods at \$5, worth \$10, a better line at \$6, worth \$12.

N. B.—These two lines retail in Toronto at \$10 and \$12 each. Every yard of above at prices quoted is like buying dollar bills for 50 cents. A customer came to us the other day and said she paid \$18 in town for a Robe, the very same as we are selling at \$6. The very best evidence possible that our prices are way under the trade. Besides these special lines we are showing an immense range of Cashmeres, Henriettas, Foulas, Amazon Cloths, Plaids, Stripes and Fancy Goods of every kind, quality and make, at very low prices.

MOURNING DRESS GOODS

Is another great specialty with us. We do honestly believe we have sold more Mourning Dress Goods during the last year than any other three houses in Napane, simply because we carry a very complete assortment of the finest and best makes of French, German and English Cashmere, Henriettas and Parmanas in Silk and Wool Wools, and are cutting the prices down to the quick in each and every case. Another advantage in buying your Dress Goods from us is that you can by this means have them made up on the premises by Miss Sanderson, whose reputation as a thoroughly first-class Dressmaker is second to none in this section of Ontario. Her charges are very moderate and her work beautifully finished and fit guaranteed. Our general stock of Dry Goods and furnishings throughout is equally as complete as the one line mentioned, but space will not permit our going into details.

The Millinery Season is on us and we are ready with the finest and most elegant stock of Millinery we have ever shown. Mrs. Doxsee has selected her stock with the greatest care. Our trimmers have also visited the wholesale openings and are posted as to the latest and most correct styles. Our large staff of first-class assistants are already driven to death on orders. Everybody comes direct to Mrs. Doxsee for fine Millinery. Our stock is now very full and complete, and is by far the grandest we have ever shown. Leave your orders early with us before the big rush commences.
